Rationale

Following global market declines in early April triggered by President Trump's U.S. tariff announcements, stock markets have since rebounded strongly, with many reaching record highs. In response, Morningstar has made several adjustments to the portfolio to ensure it remains well diversified and aligned with the current market environment. These changes also include the reinvestment of excess cash from recent end-of-financial-year distributions.

Australian Equities

Morningstar has implemented a modest reduction in Australian equities, maintaining a preference for international equities to capture broader diversification benefits and long-term growth opportunities. Key changes include:

- **Manager Changes:**
 - **Exited:** *Fidelity WS Plus Australian Equities*
 - **Added:** *Solaris Core Australian Equity Fund* – This fund offers a more diversified Australian equity exposure with a quality bias, helping to reduce concentration risk within the domestic allocation.
- **Allocation Adjustments:**
 - Trimmed exposure to *Schroder WS Plus Australian Equity Fund*

These changes improve balance across investment styles and manager exposures.

International Equities

The portfolio remains overweight international equities, though marginally less so than previously. Adjustments have been made to holdings, to enhance core exposures, and improve diversification:

- **New Exposure Added:**
 - *Life Cycle Global Share Fund (Hedged)* – Introduced as a core holding due to its consistent performance, low tracking error, and suitability across varying market conditions.
- **Exited Holdings:**
 - *GQG Partners Global Equity Fund* and *MFS Global Equity Fund* – Removed due to style drift and diminishing alignment with the portfolio's strategic role expectations.
- **Increased Exposure:**
 - *iShares S&P 500 ETF (Hedged)* – Position increased to enhance exposure to large-cap U.S. technology and communication sectors, which were underrepresented previously.
- **Other Adjustments:**
 - Minor reweighting's across *Barrow Hanley Global Share Fund* and *Capital Group New Perspective Fund* to maintain intended asset class, manager and sector exposures.

Fixed Income

- **Australian Fixed Income:**
 - Rebalanced to target allocation, with no manager changes.
- **International Fixed Income:**
 - *PIMCO Wholesale Plus Global Bond Fund* increased due to belief in offering strong diversification and broad-based global fixed income exposure.

Cash Management

Cash levels temporarily increased due to end-of-financial-year distributions recently. These have now been redeployed across the portfolio in line with target allocations as part of the broader rebalance and portfolio changes.

These adjustments reflect our commitment to maintaining a diversified, risk-aware portfolio that remains aligned with longer-term strategic weighting and investor objectives.

Investment Principles

Our search for quality & value never ends.

Our three investment principles inform every investment decision we make.

01 We champion investors.

We believe that if investors win, we all win.

We are independent minded which allows us to make investment decisions with the focus on helping investors meet their financial goals.

Investment decisions are made with the end investor in mind.

02 We take a fundamental approach.

We believe that fundamental factors, such as the quality of personnel and an investment's future earnings will drive results.

Powerful analytics and models are behind our research and portfolios, giving us the confidence to take a long-term perspective.

We stand firm behind our investment views, even if they are unpopular. This means being willing to ride out market volatility.

03 We believe that price matters.

We anchor on an investment's underlying intrinsic value rather than fleeting news, sentiment or momentum.

Focusing on the difference between price and intrinsic value enables investors to get more than they're paying for.

We also believe controlling costs helps investors build wealth by letting them keep more of what they earn.
