Morningstar Take by Shamir Popat 28 Mar 2024

The Barrow Hanley Global Value Equity strategy possesses attributes that continue to deserve our highest conviction. We have high regard for both its time-tested and disciplined approach to pragmatic value investing and its tenured, high caliber team that has executed it in an unwavering fashion. Strategy lead Brad Kinkelaar continues to manage the portfolio, assisted by comanagers David Ganucheau and Cory Martin, who have 19-plus years of experience. The departure of portfolio manager TJ Carter in May 2023 was the only voluntary turnover within the team in decades, a clear indication of the firm's strong culture. The team members are well-versed in Barrow Hanley's approach to value investing and have spent considerable time working together. The highly regarded portfolio managers are supported by a well-resourced analyst network that scours the investable universe for opportunities. We like the collaborative culture, and sensible succession planning mitigates key-person risk. Robust bottom-up fundamental analysis underpins this strategy as the team seeks to identify companies with attractive valuations that other investors fail to recognize. Another appealing hallmark is the portfolio tilting between defensive value and cyclical value positions as the market evolves, rather than being wedded to a single value substyle. Investors should note that the portfolio tilting is an outcome of the bottom-up selection rather than an explicit macro call. Owing to the natural tilting of the portfolio, deep-value rallies may leave this strategy behind because the portfolio holding measured allocations in both defensive and cyclical value names. This process results in a diversified 50- to 70-stock portfolio with a true investor mindset; commensurately, active share is high and turnover low. The underlying strategy has been running since 2010 and has performed well ahead of the MSCI World Value Index and well ahead of most of its value peers, given its ability to avoid the risks in deep-value stocks. This is a commendable long-term performance profile. The attributes of the Barrow Hanley Global Value Equity make it an ideal candidate for investors seeking a value-oriented exposure

Morningstar Take by Stephen Welch 25 Jun 2024

Capital Group New Perspective (which includes the American Funds US mutual fund and the Luxembourg, Australia, and Japan vehicles) stands out from the pack with a veteran management team, robust analytical support, and proven process focusing on firms benefiting from global trade. The strategy employs a sensible approach focusing on global multinationals that can take advantage of evolving global trade. Capital Group, the parent of American Funds, splits the strategy's hefty \$135 billion asset base into individual sleeves among 10 named managers, a handful of undisclosed up-and-comers, and two analyst-run research sleeves. Two principal investment officers help ensure the strategy's sleeves meld together into a diversified global portfolio. The managers run their portions of the overall portfolio as they see fit but must stick to companies that receive at least 25% of their revenues from outside their home region and have at least a \$3 billion market-cap float at the time of purchase. This strategy benefits from a stable team of industry experts. Four of its 10 managers have served together since December 2005, with Robert Lovelace (the longest-tenured manager) serving more than 23 years. While veteran manager Jonathan Knowles retired in early 2024, the firm named Anne-Marie Peterson and Kohei Higashi as managers in November 2023. Peterson and Higashi had been managing small portions of the strategy as undisclosed managers for three years each. Behind the management team sits a deep and talented team of more than 100 analysts. The strategy has been incredibly consistent and has typically gotten ahead by protecting capital in down markets. Over the trailing 10 calendar years, the US fund landed in the global large-stock growth Morningstar Category's bottom half only once while placing in the top quartile in five. While the strategy didn't keep pace with the MSCI ACWI Growth Index in 2023, its trailing five-, 10-, 15-, and 20-year returns through May 2024 all ranked in the category's top third or better. This is a promising global equity option, and there's little reason to believe the strategy can't build on its record.

Morningstar Take by Giovanni Cafaro 05 Apr 2024

A time-tested process and a well-credentialed and collegial team make Colchester Global Bond a sound choice for investors seeking global sovereign bond exposure. Fixed-income veterans and Colchester co-founders Ian Sims, Keith Lloyd, and Kathryn Elsbey have worked together since 2000, leading an experienced investment team that exhibits low turnover. While the leaders have been in place long term, there is a depth of investment talent that they can leverage. The culture of the firm promotes probing inquiry and rational decision-making, which is important as their process leads to significant tilts away from the benchmark, the FTSE World Government Bond Index, WGBI. Colchester applies a value-oriented philosophy to investing in government bonds and currencies. It is a clear, simple, and repeatable process centered on assessing value using proven economic frameworks: expected inflation-adjusted real return and purchasing power parity forecasts over the medium term. The team undertakes detailed country financial stability research and is one of a handful of sovereign bond managers that incorporates environmental, social, and governance factors into its process. The team's value approach and preference for markets with a higher real yield has historically led to a differentiated portfolio with a skew toward "nonclassic" countries. Being prepared to back their research has resulted in significant underweightings in the major US and euro government-bond markets and consequential significant overweightings in countries such as Mexico, Indonesia, and Colombia. The strategy's typical country and currency allocations can therefore lead to risk/return outcomes that may differ compared with its benchmark, as well as core peers in the space. However, the discipline of the approach has paid dividends with better risk-adjusted performance than its benchmark, the FTSE WGBI, and Morningstar Category peers since inception. While higher-than-average fees on some of the strategy's share classes are a headwind, for patient investors, Colchester remains a worthwhile option in the global-bond space.

Morningstar Take by Morningstar Manager
 Research 30 Nov 2024

Fidelity Australian Equities' esteemed portfolio manager and time-tested approach is the driving force behind our continued conviction. Paul Taylor has led this strategy uninterrupted since its inception in 2003 and is the key architect behind its investment philosophy, process, and portfolio construction. We regard him as one of the most talented investors in the industry, owing to his deep and broad investment knowledge. In January 2022, he was made head of investments at Fidelity Australia. Importantly, the additional duties are minimal, and we don't believe it has been a burden on his time. While key-person risk exists here, we are confident that Taylor remains fully engaged and highly motivated. Our admiration for Taylor's patient long-term mindset and diligent approach remains steadfast. The portfolio's annual turnover has indeed been consistently low, averaging around 11% over the past five years to September 2024. The underperformance from 2022 to October 2024 is ultimately Taylor's second blemish in an otherwise stellar extensive track record, a rare achievement. The market environment during this time exhibits notable similarities to the post-2016 "reflation rally" period, which was the strategy's first relative setback. Macroeconomic forces like inflationary pressures, rising interest rates, and the US federal election cycle shaped equity markets globally over these timeframes. Against this backdrop, the quality-growth portfolio will naturally face challenges because of its bias for long-duration, high-quality, cash-generative franchises, which tend to be interest-rate-sensitive and carry premium multiples. A few idiosyncratic missteps have undeniably added to the short-term woes here. However, a combination of the unwavering application of the "through-the-cycle" approach and a proven track record in identifying structural growth winners, instills confidence in the strategy's ability to deliver superior long-term returns. Overall, we are confident that the strategy's distinguished portfolio manager and core principles will steer it through this short-term challenge and return it to a path of sustained success. The primary vehicle from which this

Morningstar Take by Gregg Wolper 07 May 2024

QG Partners Global Quality Equity (named QG Partners Global Equity outside the US) succeeds with a talented manager, a robust analyst staff, and a highly original approach. Lead manager Rajiv Jain has racked up an impressive record running several funds during long tenures at previous employer Vontobel and at QG, which he co-founded in 2016. This global strategy, launched in Australia in June 2017 and in the US in late March 2019, has flourished. Its results were especially noteworthy in 2022's dismal market conditions and in early 2024. (Its strong gains in 2023 didn't stand out in a powerful broad market rally.) The institutional shares of the US-domiciled fund lost only 3.7% in 2022, while the strategy's MSCI All Country World Index benchmark dropped 18.4% and the global large-stock growth Morningstar Category (for US-based fund) plunged 27.9%. In the first four months of 2024, the US institutional shares soared 13.7%, far above the category average (which rose 4.5%) and the benchmark (up 4.6%). Jain and his colleagues achieved these results by heavily weighting stocks common in other portfolios—such as recent top-10 holdings Meta Platforms, Alphabet, and Novo Nordisk—while also profiting immensely from lesser-known stocks such as AppLovin and subsidiaries of the India-based conglomerate Adani. In addition, Jain is exceptionally willing to make unorthodox moves and shift direction decisively. For example, at the end of 2021, Meta was absent from the portfolio; two years later, it was the number-one holding at nearly 8% of assets. At a sector level, the portfolio held no energy stocks at all in 2020 but stashed more than 20% of assets there throughout 2022. Meanwhile, Adani had been the target of a scathing short-seller's report that had sent most investors scurrying. Jain and team investigated, decided the criticism was overblown, and picked up shares that had declined sharply in price. The stock soon shot upward. Decisive shifts of sector and bold moves into controversial stocks can easily backfire. But Jain has taken such steps before—though not as frequently—and has proven his abilities over more than two decades. This offering isn't for the meek but holds

Morningstar Take by David Little 07 Mar 2024

Janus Henderson Tactical Income utilizes the manager's value-oriented process in a more flexible absolute-return-oriented manner, through a stable and experienced team. Its leader Jay Sivapalan has been with the firm for more than two decades and has been able to rebuild a flat and cohesive team culture since he assumed lead responsibility five years ago. While Sivapalan remains the key individual, he is well supported by Shan Kwee, who continues to impress with his growing leadership and oversight of credit, alleviating some of the key-person risk. In April 2023, Emma Lawson was hired as an investment strategist to replace the retiring Frank Uhlenbruch, maintaining strong experience within the team. ESG strategist Liz Harrison is also a recent senior addition who has been leading the team's broader push into sustainability. The strategy offers more flexibility and less interest-rate risk relative to a typical Australian bond offering, courtesy of its split index (50/50 AusBond Bank Bills and AusBond Composite indexes). In addition to the traditional AusBond Composite Index universe (Australian government and government-related bonds, credit, and securitized instruments) the portfolio can invest in riskier sectors like emerging markets, loans, and high yield, though the team has historically used these exposures sparingly. The portfolio can also invest in hybrids opportunistically. The strategy's structurally lower duration was beneficial during the 2021-23 rising interest-rate environment relative to Morningstar Category peers. This strategy tends to allocate more heavily to credit for income yield and overall is expected to provide less defensive cushion in periods where equity markets sell off. The quality of the Janus Henderson capability makes this a strong choice for investors seeking a more flexible absolute return approach with less interest-rate risk. The primary vehicle from which this strategy's pillar ratings are derived is Janus Henderson Tactical Income, ticker 17406.

Morningstar Take by Morningstar Manager
 Research 30 Nov 2024

We maintain our conviction in Magellan Infrastructure thanks to its highly experienced investment team and disciplined investment process, which adopts a clearly defined but risk-averse approach to investable infrastructure. The strategy's investment team is a knowledgeable and well-resourced group of eight infrastructure/utilities specialists, consisting of five portfolio managers and three investment analysts. Gerald Stack (head of infrastructure and lead portfolio manager) helps the strategy and is an investor we have held in high regard since our coverage of the fund commenced in 2015. While key-person risk can't be fully discounted, we are pleased that Stack and his team have remained stable, focused, and committed during the distractions that have occurred within the broader Magellan business since early 2022. Magellan Infrastructure's fundamental investment process is long-established, time-tested, and rigorously applied. The investment process is more conservative than most peers owing to a strict definition for investable infrastructure, while portfolio construction is disciplined. Under Magellan's investment process, a company must possess an asset that is essential for the efficient functioning of society and have earnings that aren't overly affected by competition, commodity prices, or sovereign risks to be considered for inclusion. This risk-conscious approach typically leads to a greater utilities allocation, though allocations to cyclicals can rise should the view of economic conditions be more optimistic. This measured outlook tends to deliver downside protection in market selloffs, but the strategy can lag during more cyclically driven markets. This was evident in 2022 when the strategy's absence of commodity price-sensitive infrastructure stocks saw the fund materially lag the category benchmark. Despite the risk of short-term deviations from the benchmark, the process is well aligned to investors who allocate to infrastructure for inflation and downside protection. Magellan Infrastructure's strengths include an insightful team, a conservative investment process, and a disciplined portfolio construction methodology. The primary vehicle from

Morningstar Take by Tim Wong 23 Jan 2024

MFS Global Equity retains the qualities we admire: a pair of insightful portfolio managers who actively look to harness the firm’s extensive research staff while patiently implementing their well-trodden process. Comanagers Roger Morley and Ryan McAllister uphold a long-standing tradition of investing in reasonably priced companies with a steady growth outlook. Morley has strong bona fides over his lengthy involvement here while McAllister’s transition to comanager in 2016 has been as smooth as could be hoped; he’s steadily broadened his knowledge across industries and worked cohesively with Morley. Further, we think the duo utilizes MFS’ broader analyst team very effectively. Their long-term perspective remains paramount in gauging their colleagues’ insights on company and industry-level views, and the portfolio managers’ clear recall of how their historic views have evolved reinforces the consistency of the approach taken. The methodical approach is straightforward and disciplined and ignores index weightings, as seen in its long-standing skew to industrials and healthcare companies at the expense of commodities and technology. That said, it hasn’t all been plain sailing. Emphasizing valuation has contributed to stock-specific stumbles, owning some companies facing more concerted cyclical pressures than expected. Tension in balancing quality and value is inevitable, so we are heartened that more borderline prospects have generally been among the smaller-sized positions—a tribute to sensible portfolio construction—while missed opportunities in faster-growing firms have never been this strategy’s calling card. Consternation over subpar performance is understandable, though the market’s abandonment of high-flying growth stocks in 2022 was a reminder that styles can shift from favor swiftly. The team has also continued to identify plenty of longer-term winners elsewhere. MFS also has a demonstrated history of putting client interests ahead of its own when it comes to managing capacity in both its Core and Concentrated global equity strategies. In multiple areas, MFS Global Equity remains a winning proposition. The primary vehicle from which this strategy’s pillar

Morningstar Take by Morningstar Manager
 Research 30 Nov 2024

Pimco Global Bond is backed by three skilled managers who draw on the firm's extensive resources, and it benefits from a flexible, diversified approach, earning High People and Process ratings. Lead manager Andrew Balls has two decades of experience running global and European mandates, and the three-person investment team, including veteran comanagers Sachin Gupta and Lorenzo Pagani, is well-equipped to cover rates, currencies, corporates, and structured credit. Pimco's top-down views, driven by the firm's investment committee on which Balls sits, guide the strategy's broad positioning. Within the scope of those themes, Balls and his team consider relative valuations to determine sector, country, and yield-curve positioning. The setup resembles that of many of its global bond Morningstar Category peers, but the approach of this strategy also allows for considerable flexibility. The fund has historically held up to half its assets in corporate bonds, and up to a third in emerging-markets debt; it can also invest up to 10% in below-investment-grade bonds. The team has used this latitude well and in moderation along with its work in developed-markets sovereign bonds, which typically anchor the portfolio. Andrew Balls has also tended to stay on the shorter side of the benchmark's duration, which detracted from returns in the fund's earlier history but helped during recent interest-rate shocks (such as in the first quarter of 2021 and again in 2022). While the portfolio was light on several credit-spread sectors in late 2024 (as the team didn't see compelling opportunities in the market's riskier pockets), over long periods Pimco has demonstrated considerable skill in corporate credit, securitized bonds, and currencies. Over the trailing three, five, and 10 years through September 2024, the fund's institutional USD shares largely outpaced the category average and the benchmark index while keeping volatility in check. All told, this team is well-equipped to take advantage of the strategy's flexibility over the long haul. This vehicle has been assigned a Morningstar Medalist Rating of Gold as of date November 30, 2024. An analyst assessed the People, Process, and Parent

Morningstar Take by Ross MacMillan 26 Jul 2024

Resolution Capital Global Property Securities features four outstanding portfolio managers and a straightforward but comprehensive investment process. This high-conviction strategy remains one of our very favorite ways to access global listed real estate investments. Andrew Parsons is the founder of Resolution Capital and holds the roles of chief investment officer and portfolio manager. Parsons' presence underpins our positive view of the team, but this clearly is not a one-person show. For many years, the firm has used a four-person portfolio-multimanager strategy. The other three managers (Marco Colantonio, Robert Promisel, and Julian Campbell-Wood) joined Resolution in 2002, 2011, and 2013, and are all highly seasoned property investors, putting the Resolution team's experience and stability well above rivals despite periodic turnover among the investment analysts. Each portfolio manager takes responsibility for investing approximately 25% of total funds under management, helping reduce key-person risk. All the portfolio managers use the same proprietary research and adopt the same investment procedures. The time-tested investment process is based on four significant principles: Focus on the underlying real estate asset rather than an index, understand real estate is cyclical and capital-intensive, value strong stewardship, and avoid permanent impairment of capital when investing. Critically, the team uses detailed fundamental analysis combined with a top-down overlay, reflecting the dynamics of various real estate markets, to search for investable property companies and trusts that operate in high-barrier-to-entry markets where landlords have pricing power and have a high level of recurring earnings, combined with low debt levels. The resulting 40- to 60-stock portfolio is concentrated, benchmark-unaware, and mainly diversified across developed markets. The strategy over the decade to June 30, 2024, has outperformed the index. However, being a high-conviction strategy, returns can be volatile against the index in the short term. The strategy comes in several share classes and an exchange-traded fund (ASX:RCAP), with the wholesale version slightly more expensive.

Morningstar Take by Shamir Popat 20 Dec 2024

Schroder Australian Equity has notable merits, with its skilled leadership applying its robust and battle-tested investment process in an unwavering fashion. The elevated turnover in the team in recent years has persisted, with Ben Chan being the latest departure in August 2024. Cumulatively, these led to concerns around talent retention, the quality of the analyst team, and succession planning. This has warranted a downgrade in the People Pillar rating to Above Average. However, the revised rating still captures the strengths that are present, especially among the senior bench at the helm. Head of Australian equities Martin Conlon has managed this fund since 2003, while deputy head of equities Andrew Fleming has been with Schroders since 2007. Conlon and Fleming are especially thoughtful in applying their 34 years' experience each in researching companies and understanding the economic backdrop when building the portfolio. The broader investment team has a bench of senior and midcareer members that are well-versed in the process, with newer joiners getting traction. That said, ensuring that talent is retained is now a key watchpoint. Schroders' investment process involves detailed fundamental bottom-up company assessments to gain an understanding of quality and value. The primary focus of the research is on appraising a company's pricing power, long-term sustainability, and midcycle earnings. We appreciate the team's assiduous application of the repeatable investment process. In addition, we applaud the team's multiple-perspectives approach when scrutinizing company risks, including environmental, social, and governance issues and thematic influences. The resulting benchmark-aware portfolio of around 40–70 stocks is long-term, balanced, and value-tilted. The investment market environment in the past two years to Nov. 30, 2024, has not been conducive to the strategy's approach seeking sustainable cash-flow-generative businesses. Though, through the cycle, the evidence in generating alpha is notable. Overall, its competitive fee, skilled leadership, and enduring process give us confidence in our conviction of the outperformance over the long term. The primary vehicle

PDS Objective

The Fund aims to provide investors with a total return (before management costs) equivalent to the Bloomberg AusBond Bank Bill Index over rolling 12 month periods.

Fund Investment Strategy

The strategy is managed employing both top-down research and bottom-up security-specific analysis to build a portfolio of cash and cash equivalent securities.

Morningstar Take by Thomas Dutka 12 Sep 2024

Despite sudden unplanned changes in the manager's global investment leadership, Western Asset Australian Bond's simple approach and excellent team make it a solid domestic fixed-income option. In late August 2024, Western Asset's co-CIO Ken Leech stepped down from the firm amid investigations from the US SEC and Department of Justice concerning US Treasury derivative allocations across accounts managed out of the US. The departure follows the abrupt exit of Federal Reserve policy lead John Bellows in May 2024. Overcoming both key-person losses would be a lot for any firm to handle. That said, this strategy is unlikely to be affected by these departures, given its Australian focus and its management by a veteran Melbourne-based team. Anthony Kirkham is the lead portfolio manager and we hold him in high regard. He is supported by a stable, impressive investment team of six portfolio managers, credit research analysts, and traders. Other than recent appointee Stella Li, an internal hire who fills the role vacated in early 2024 by trader Anthony Francis, the remaining five team members each boast over 25 years' industry experience and extensive tenures working together at Western. There's an appeal to the strategy's straightforward and relatively conservative investment process. It targets an active return of 75 basis points per year (gross of fees) above the Bloomberg AusBond Composite 0+ Index over the market cycle, with an expected tracking error of 100 basis points per year. It seeks mispriced domestic fixed-interest securities, with sector allocation and issuer selection being the major active return drivers. The strategy's persistent credit overweight can be a negative in risk-off conditions, although the team has successfully navigated a number of credit cycles, emphasizing its rigorous credit analysis. While it has modestly underperformed its return objective over the medium to longer term, it has done so by utilizing active risk well below its target, delivering robust risk-adjusted returns. Its return performance has also been consistently strong compared with its Morningstar Category average. Overall, despite Western's offshore turmoil, our conviction

in this strategy remains unchanged. It is run by a topnotch team and the simplicity of its approach continues to make it a compelling domestic fixed-income offering. The primary vehicle from which this strategy's pillar ratings are derived is Western Asset Australian Bond, ticker 5471.

Managed Fund Investment Detail Disclosure Statement - Advanced

Quick Stats

Morningstar Category™

Based on exposure to asset classes, investment sectors, the investment style and market-cap allocation, and the associated risk and return characteristics of funds. The objective of the classification system is to provide groupings of funds which can be reasonably considered to be close investment alternatives and for which performance and other statistics such as fees are comparable.

Morningstar Medalist Rating™

Is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to the Section titled "Methodology Documents and Disclosures"

<https://shareholders.morningstar.com/investor-relations/governance/Compliance--Disclosure/default.aspx>

% Data Coverage: the level of data completeness used to generate the overall rating. If the pillar is assigned directly or indirectly by analysts (pillar inheritance), the pillar will have complete data (i.e. 100%). If the pillar is assigned by machine learning algorithm, Morningstar counts the number of data points feeding both the positive and negative models and counts whether the vehicle has strategy-specific data available. A percentage is calculated per pillar. The overall % data coverage is then scaled by pillar weights. Morningstar will not produce a Medalist Rating with less than 80% data availability for algorithmically assigned pillar assessments.

Analyst-Driven Proportion: displays the weighted percentage of a vehicle's pillar ratings assigned directly or indirectly by analysts (pillar inheritance). For example, if the Parent and Process ratings are assigned directly or indirectly by analysts but the Process rating is assigned algorithmically, the Analyst-Driven Proportion for an actively managed vehicle would disclose that 55% of the pillar weight was assigned by analysts. In the case of a passively managed vehicle the Analyst-Driven Proportion would disclose that 90% of the pillar weight was assigned by analysts.

Morningstar Pillars: The three Medalist Rating assessment pillars - People, Parent and Process - may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using Morningstar's machine learning algorithm. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars evaluated with Morningstar's machine learning algorithm are displayed with "Q" behind the Pillar name.

Morningstar Rating™

The rating is calculated for funds with at least a three-year

history based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance. The top 10% of funds in each peer group receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The peer group is determined by the fund's Morningstar Category and Legal Type. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year Morningstar Rating metrics.

Morningstar Take

The Morningstar Take is a summary of Morningstar's overall opinion of the fund manager's strategy and capabilities in the asset class. If Morningstar has not qualitatively reviewed the manager, the PDS Objective and Fund Investment Strategy will appear in its place.

Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment.

Growth of \$10,000: The graph compares the growth of \$10,000 in a fund with that of a capital market index chosen by Morningstar and with that of the average growth for all funds in its Morningstar peer group. The index is an unmanaged portfolio of specified securities. The index and the category average do not reflect any initial expenses however the category average returns are net of ongoing fees. A fund's portfolio may differ significantly from the securities in the index.

Quartile Rank: The graph represents the fund's total return percentile rank among funds in the same peer group. The black bar on the graph represents the quartile in which the fund-performance ranking falls. If the top quarter of the graph is shaded, for example, the fund performed among the top 25% of its category that year.

Total return reflects performance without adjusting for sales charges but is adjusted to reflect all actual ongoing fund expenses and assumes reinvestment of distributions. Growth return is the percentage change in the scheme's soft close exit price adjusted for any capital re-organisation. Income return is the total return less growth return and reflects the level of distributions from a fund. For Australian funds, performance is not adjusted for taxation. For New Zealand PIE funds, tax credits are added back to the performance. For New Zealand non-PIE funds returns are calculated net of tax. Trailing returns for periods over one year are annualised.

Risk Measures

Standard deviation: Statistical measure of the volatility of the fund's return.

Sharpe ratio: A risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. A positive Alpha figure indicates the portfolio has performed better than its beta would predict.

Beta: A measure of a fund's sensitive to market movements. If beta is greater than one, movements in value of the fund that are associated with movements in the value of the benchmark tend to be amplified.

R-Squared: Measures the relationship between a portfolio and its benchmark. It can be thought of as a percentage from 1 to 100. R-squared can be used to ascertain the significance of a particular beta or alpha. Generally, a higher R-squared will indicate a more useful beta figure.

Fees

Total Cost Ratio (Prospective): Represents the

forward-looking figure encompassing the total non-discretionary fees and costs associated with managing and administering collective investment products.

Buy-Spread/Sell-Spread: A transaction cost incurred by the investor that reflects an estimated transaction costs incurred by the fund in dealing with the underlying securities as shown in the PDS.

Performance Fee Costs: Performance Fee shown in the "Fees and Costs Summary" table in the PDS. It is intended as a representation of potential on-going performance fee expenses and is a calculated average using the performance fee costs from the last five financial years (or as many as the performance fee was applicable). This amount includes the Performance Fee costs arising from Interposed Vehicles.

Investment Management Fee: The Management Fee (MIS) and Investment Fees (Super) shown in the PDS, that is attributable to investment management, which are fees and costs an investor would expect to be charged over the year. This excludes the costs arising from interposed vehicles.

Administration Fees and Costs (Super Funds only): shown in the "Fees and Costs Summary" table in the PDS. This includes OTC Derivative Costs deemed to be Administration costs.

Portfolio

Composition: The graph represents a breakdown of the fund's holdings into general investment classes based on surveyed data provided by the fund manager.

Morningstar Style Box: For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitive as measured by a bond's duration (short, intermediate or long).

Top Holdings: The largest exposure of eligible securities within a fund's portfolio. Portfolio holdings information is based on the most recent information available to Morningstar, and eligible securities are defined by Morningstar's Global Methodology team, and will exclude positions not considered core to the portfolio.

Top 5 Sector Weightings: The Morningstar sector structure divides the stock universe into 129 industries ranging from semiconductors to medical equipment. These industries are classified into 41 industry groups, which are then used to construct 12 separate sectors.

Top 5 Countries: The largest geographical exposure of a fund's stock assets. Country assignments are based on the primary exchange where each stock is traded.

Operations

Minimum Initial Investment: The smallest investment amount accepted by the product to establish a new account.

Minimum Additional Investment: The amount required to make subsequent investments in the product.

Minimum Withdrawal: The smallest amount that can be taken out of the product at one time.

Switching Allowed: If it's possible to switch between investments in the same offer document.

Distributions Frequency: The number of times per year a fund intends to distribute for the life of the offer document.
