Morningstar Take Brendan McCann 30/01/25

IShares Core S&P 500 offers a well-diversified, market-cap-weighted portfolio of 500 of the largest US stocks. The fund accurately represents the large-cap opportunity set while charging rock-bottom fees, a recipe for success over the long run.

Exchange-Traded Fund (ETF) Investment Detail Disclosure Statement

Morningstar Category ™

Based on exposure to asset classes, investment sectors, the investment style and market-cap allocation, and the associated risk and return characteristics of the investment. The objective of the classification system is to provide groupings of investments which can be reasonably considered to be close investment alternatives and for which performance and other statistics such as fees are comparable

Morningstar Medalist Rating ™

The Morningstar Medalist Rating is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a riskadjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to the Section titled "Methodology Documents and Disclosures" at

https://shareholders.morningstar.com/investor-relations/governance/Compliance--Disclosure/default.aspx

% Data Coverage The level of data completeness used to generate the overall rating. If the pillar is assigned directly or indirectly by analysts (pillar inheritance), the pillar will have complete data (i.e. 100%). If the pillar is assigned by machine learning algorithm, Morningstar counts the number of data points feeding both the positive and negative models and counts whether the vehicle has strategy-specific data available. A percentage is calculated per pillar. The overall % data coverage is then scaled by pillar weights. Morningstar will not produce a Medalist Rating with less than 80% data availability for algorithmically assigned pillar assessments.

Analyst-Driven Proportion Displays the weighted percentage of a vehicle's pillar ratings assigned directly or indirectly by analysts (pillar inheritance). For example, if the Parent and Process ratings are assigned directly or indirectly by analysts but the Process rating is assigned algorithmically, the Analyst-Driven Proportion for an actively managed vehicle would disclose that 55% of the pillar weight was assigned by analysts. In the case of a passively managed vehicle the Analyst-Driven Proportion would disclose that 90% of the pillar weight was assigned by analysts.

Morningstar Pillars The three Medalist Rating assessment pillars - People, Parent and Process - may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using Morningstar's machine learning

Morningstar Rating ™

Calculated for all funds in peer groups of comparable funds and that have at least a three-year performance history. The peer group is determined by the fund's Morningstar Category and Legal Type. The Morningstar Rating is based on the Morningstar Risk-Adjusted Return measure. The top 10% of funds in each peer group receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars and the bottom 10% receive one star. The Overall Morningstar Rating for a fund is a weighted average of its three-, five- and ten-year Morningstar Ratings.

Morningstar Take

A summary of Morningstar's overall opinion of the manager's strategy and capabilities in the asset class. If Morningstar has not qualitatively reviewed the manager, the PDS Objective and Investment Strategy will appear in its place.

Pricing Information

Closing Market Price: The price of the ETF's ordinary shares as at the close of trading day.

Net Asset Value (NAV): The value of the underlying investments in the portfolio on a per share basis. This is computed daily (or monthly) by dividing the total net assets by the total number of shares. The price of an ETF relates to its NAV, but ultimately is determined by supply and demand. Therefore, an ETF may trade at a discount, premium or at par to its NAV. The NAV will fall any time an ETF makes a distribution, regardless of the distribution amount. Because NAVs fluctuate daily/monthly with the market, meaningful performance assessment should be based on the NAV rather than just movements in the share price.

Premium/Discount: The premium or discount of the market price to the Net Asset Value (NAV) expressed as a percentage of the NAV. This is based on an average of month-end prices for the year. We calculate each month-end premium/discount figure, and then average out those 12 months for an average yearly premium/discount.

'Premium/Discount Avg%': Refers to the average monthly premium or discount over the time period specified.

'Premium/Discount High % and Low %': Refer to the highest and lowest premiums or discounts over the time period specified.

Trading Information

52-Week High/Low: The highest and lowest market close prices traded over the last 52 weeks.

Average Daily Shares Traded (1 Yr): The average daily traded number of shares over the trailing 52-week period.

Shares Outstanding: The number of ordinary shares outstanding in the market as at the specified date.

Exchange: The local stock exchange on which the ETF is listed and trading.

Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment.

Growth of \$10,000: The graph compares the growth of a \$10,000 investment (based on Close Market Price and NAV) with that of a capital market index chosen by the investment manager and with that of the average growth for all investments in the equivalent Morningstar Open-End Managed Funds peer group. The index is an unmanaged portfolio of specified securities. The index and the category

average do not reflect any initial expenses however the category average returns are net of ongoing fees. A portfolio may differ significantly from the securities in the index.

Total return reflects performance without adjusting for sales charges but is adjusted to reflect any capital re-organisation (eg. an issue of bonus shares) and all actual ongoing expenses. It also assumes reinvestment of distributions. If adjusted for sales charges and the effects of taxation, the performance quoted would be reduced. Trailing returns for periods over one year are annualised.

Monthly Trading Volume (Millions): The total number of ordinary shares which has traded during each calendar month

Risk Measures (NAV)

Standard Deviation: Statistical measure of the volatility of the fund's return.

Sharpe Ratio: A risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Tracking Error %: Tracking Error is a measure of the volatility of excess returns relative to a benchmark.

Information Ratio: Information Ratio is a risk-adjusted performance measure. The Information Ratio is a special version of the Sharpe Ratio in that the benchmark doesn't have to be the risk-free rate.

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by Beta. A positive Alpha figure indicates the portfolio has performed better than its Beta would predict.

Beta: A measure of a fund's sensitive to market movements. If beta is greater than one, movements in value of the fund that are associated with movements in the value of the benchmark tend to be amplified.

Fees

Investment Management Fee % pa: This is the amount as a percentage of the investor's assets that the investment manager is entitled to charge an investor each year.

Total Cost Ratio (Prospective): Represents the forward-looking figure encompassing the total non-discretionary fees and costs associated with managing and administering collective investment products.

Portfolio

Morningstar Style Box: The Morningstar Equity Style Box[™]
For equity ETFs the vertical axis shows the market
capitalization of the stocks owned and the horizontal axis
shows investment style (value, blend or growth). For
fixed-income ETFs the vertical axis shows the average credit
quality of the bonds owned, and the horizontal axis shows
interest rate sensitive as measured by a bond's duration
(short, intermediate or long).

Top 20 Holdings: The largest equity exposures of an ETF's portfolio. Portfolio holdings information is based on the most recent information available to Morningstar.

Top 5 World Regions: An ETF's largest regional exposures.

Market Cap Breakdown: The ETF's equity investment exposure broken down by market capitalisation (giant, large, medium, small, or micro).

Barrow Hanley Global Value Equity continues to earn

Morningstar Take by Shamir Popat 11 Jul 2025

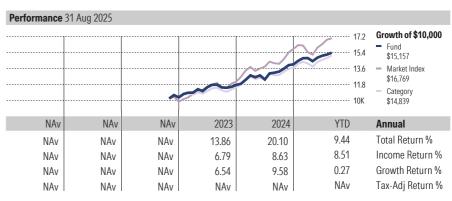

our strongest convictions in its tenured, high-caliber team and consistent approach to pragmatic value investing. The underlying share classes are available as Australian-dollar-hedged or unhedged vehicles. Strategy lead Brad Kinkelaar and comanagers David Ganucheau and Cory Martin leverage over 30 years' industry experience on average in demonstrating their skills and insights. They are well-supported by the stability, depth, and experience of the 27-member investment team, which is organized by geography and sectors. All members of the investment team have equity in the business, fostering investor alignment on top of their competitive remuneration structures. There has been some elevation in turnover over the past two years with a retirement and the departures of two analysts and portfolio manager TJ Carter. The latter was a rarity, considering it was the only voluntary departure of a portfolio manager in decades, highlighting the firm's strong culture. Robust bottom-up fundamental analysis underpins this strategy, as the team seeks to identify solid businesses that are mispriced by the market. Downside scenarios are a consideration when evaluating the investment theses and avoiding value traps, supporting strong risk management. A distinguishing feature of the strategy is its ability to tilt between defensive and cyclical value positions as market conditions evolve, an outcome of bottom-up stock selection rather than top-down macro calls. As a result, the portfolio may lag during sharp deep-value rallies because of its balanced exposure across value substyles. This process results in a diversified 50- to 70-stock portfolio with a true investor mindset, commensurately, active share is high, and turnover is low. The underlying strategy has been running since 2010 and has performed well ahead of the MSCI World Value Index and well ahead of most of its value peers, given its ability to avoid the risks in deep-value stocks. This is a commendable long-term performance profile, though it is noted that the value style can deviate from the Morningstar Category Index benchmark for prolonged periods. Barrow Hanley

Morningstar Take by Stephen Welch 16 Jun 2025

American Funds New Perspective's (which includes the Capital Group-branded Luxembourg, Australian, and Japan vehicles) experienced managers and unrivaled analytical support ply a well-thought-out process focusing on firms benefiting from global trade. Morningstar has changed the way we assess alpha opportunity for funds, which is a key component in our Morningstar Medalist Rating calculation. More of this strategy's Medalist Ratings than usual may therefore change with this update, even in the absence of substantial changes to pillar ratings or fund costs. Industry veterans steer this strategy. Four of the strategy's 10 managers have served together since December 2005, with most tenured Robert Lovelace serving more than two decades. All but one manager has been with the firm for at least 20 years. In March 2025, Barbara Burtin took over for Joanna Jonsson (who remains a manager) as one of the strategy's principal investment officers, in charge of allocating capital among the management team. She is an up-and-comer at the firm and has been on the strategy for more than six years. Behind the management team sits a deep and talented analyst team, which consists of more than 100 members. The managers employ a proven approach focusing on global multinationals that can take advantage of evolving global trade. Capital Group, the parent of American Funds, splits the strategy's USD 145 billion asset base as of May 2025 into individual sleeves among 10 named managers, a handful of undisclosed up-and-comers, and two analyst-run research sleeves. Two principal investment officers help ensure the strategy's sleeves meld together into a diversified global portfolio. The managers run their sleeves of the overall portfolio as they see fit but must stick to companies that receive at least 25% of their revenues from outside their home region and have at least a USD 3 billion market-cap float at the time of purchase. The strategy has been incredibly reliable at protecting capital in down markets, benefiting investors over the long term. Over the trailing five-, 10-, 15-, and 20-year periods through May 2025, the US fund outperformed the MSCI All-Country World Index and ranked

in the global large-growth Morningstar Category's top 30% or better each period. In the first five months of 2025, the strategy handily outperformed the MSCI ACWI, thanks to picks like MercadoLibre and Netflix. This is a top-notch global equity option, and there's little reason to believe the strategy can't build on its record.

Above Average Growth

Morningstar Take by Steven Le 29 Aug 2025

Fidelity Future Leaders stands out for its esteemed portfolio manager and excellent process. Portfolio manager James Abela has headed the strategy since its inception in 2013, designing its investment philosophy, selecting the stocks, and building the portfolio. While Abela is an adept investor, his additional role as the co-portfolio manager of the Fidelity Global Future Leaders strategy from late 2020 somewhat tempers our enthusiasm. Nevertheless, our view of his skill and ability to manage this strategy remains positive, although full focus here remains preferable given its highly dynamic nature. Abela is competently supported by an experienced and sizable team of local investment analysts plus Fidelity's extensive global research network. Over an extended time frame, he has effectively leveraged the analyst platform to support research, and he forms his own well-considered views where necessary. The process is defined by flexible portfolio construction and rigorous stock selection. The former enables the strategy to allocate across quality, momentum, transition, and value stocks within specified risk limits, while the latter is based on the three key pillars of viability, sustainability, and credibility. This process has long been viewed positively, though doubts around execution arising from Abela's expanded role incrementally reduced our conviction in 2021. This concern has now been allayed, with the process continuing to be implemented at a high standard over a sufficient time frame, restoring our confidence. Over the trailing three years to July 2025, shrewd and well-timed adjustments to the portfolio's composition across the four styles, primarily a gradual increase in exposure to quality stocks, delivered outstanding performance relative to the average peer and more than doubled the return of the Morningstar Category index. In summary, the combination of Fidelity Future Leaders' skilled portfolio manager and strengthened confidence in the process sees the strategy regain its place at the top of its category. The primary vehicle from which this strategy's pillar ratings are derived is Fidelity Future Leaders, ticker 19893.

Morningstar Take by Gregg Wolper 28 Mar 2025

GQG Partners Emerging Markets Equity is one of the most unusual emerging-markets strategies around, and one of the most appealing. This offering stands out in several ways. Although it leans toward growth-GQG stands for "global quality growth"-it is not wedded to a certain style-box placement. Manager Rajiv Jain, who runs the fund with two comanagers and a deputy manager, says this is deliberate. He argues that maintaining a long-term commitment to one style or consistently avoiding certain types of stocks-especially when market environments, economic conditions, and government policies are in flux—is a recipe for underperformance. But when he does identify many companies worth owning in a certain sector or country-or conversely, finds few tempting options-the portfolio will feature much heavier over- or underweightings than most peers. In addition, more than most rivals, Jain is willing to include US-domiciled companies such as Nvidia and Meta Platforms in this portfolio. Jain's history also sets this strategy apart. He has established an impressive record of success long-term runnina emerging-markets funds at GQG and his previous employer, Vontobel Asset Management, since the 1990s. Currently, several portfolio distinctions catch the eye. For a variety of reasons, Jain and his team are wary of the prospects for most Chinese companies and thus have been deeply underweight there versus the MSCI Emerging Markets Index and the diversified emerging-markets Morningstar Category average. A long-standing major overweighting in India has remained in place, albeit with some adjustments. Both stances have hurt performance in the short run. After several years in the doldrums, China's stock market recently revived, while India's once-hot market made the reverse trip. From July 1, 2024, through Feb. 28, 2025, the institutional shares of the US-domiciled mutual fund declined 11.7%, trailing far behind the 0.1% gain of the typical category peer and the positive 2.3% return for the fund's benchmark, the MSCI Emerging Markets Index. But that isn't much of a concern. The strategy has hit bumps before, yet with strong showings in most periods, those shares' return from Jan. 1, 2017

Morningstar Take by Steven Le 05 Oct 2024

Ironbark Paladin Property Securities' impressive investment team and differentiated approach are the foundation of our ongoing confidence in the strategy. Co-lead portfolio managers Chris Robinson and Todd McFarlane, and small-caps specialist Eloise Blake, have delivered a strong track record employing a consistent approach since the investment process was enhanced in 2013. Each member brings a distinct skill set to the process that seeks to generate outperformance over the Morningstar Category index from three distinct sources: stock selection in large-cap AREITs, active investment in small-cap AREITs, and selective participation in international deal flow. This setup provides flexibility in a concentrated and relatively top-heavy sector-and more importantly, the group maintains a competitive edge in each area of focus. Blake also took on portfolio management responsibilities from 2022, a positive step that adds continuity to this tight-knit group. The process focuses on relative valuations and quality characteristics within each property subsector, minimizing factor and style bets while maximizing the returns from superior stock selection. The team works collaboratively to analyze opportunities in different market segments, though Robinson and McFarlane are key to portfolio construction and large-cap positioning. Robinson doubles as head of listed real estate securities Asia-Pacific, leveraging its position within global asset manager DWS to take advantage of opportunistic deal flow (usually placements and IPOs) across the globe. Even though the portfolio's total international exposure is expected to remain below 5% at any point in time, it has nonetheless been a valuable contributor to relative returns. Blake's focus on small caps ensures the team is ready to capitalize on opportunities in emerging, less-efficient, and under-researched areas of the market. Despite the downward trend in active share from late 2022 to June 2024, the multifaceted approach has allowed for meaningful outperformance over multiple time frames, such as in 2023. Overall, Ironbark Paladin Property Securities continues to be a solid domestic listed real estate strategy. The primary

Equity World - Currency Hedged

Morningstar Take by Daniel Haydon 19 Aug 2025

Life Cycle Global Share is an attractive offering from the recently launched boutique manager Life Cycle Investment Partners. We see strength in the talented and experienced investment team. They are the architects of an investment process that has proved its worth over the long term in prior incarnations. Our conviction is capped by the still short history of implementation in this setup, so we initiate coverage with a People Pillar rating of High and a Process Pillar rating of Above Average. The fund is managed by senior portfolio managers Peter Rutter, James Clarke, and Will Kenney, and portfolio manager Chris Parr. The overall investment team comprises seven investors, who left Royal London together to set up this boutique, with the backing of Pinnacle Investment Management. We consider this to be an exceptionally strong team, well-resourced and equipped with a diverse range of skills. The managers impress with their depth of knowledge and true passion. Rutter, Clarke, and Kenney have worked together for over 20 years and are architects of the distinctive process that finds its foundation in corporate lifecycle theory. Their accumulated learnings have been invaluable, leading to subtle tweaks in the process. The managers have steered clients through a wide variety of market environments to good effect. While the process makes judicious use of some quantitative techniques, qualitative analysis is also highly important. We think the people at the helm are crucial and hold the team in high regard. The use of sports psychologists and the behavioral edge built over time (such as comfort investing in turnarounds) and long-termism are important, too. The process engineered by the managers is also highly attractive. The managers invest in companies spanning all corporate lifecycle stages: accelerating, compounding, fading, mature, and turnaround. The approach has its grounding in financial academia, and different characteristics are sought out depending on a company's lifecycle stage. Capital allocation and cash flow analysis are central. The process is intellectually sound. Portfolio construction and risk management are well-reasoned and incorporate multiple dimensions

of risk. The managers aim to be broadly style neutral to isolate idiosyncratic risk. There is a focus on optimal long-term capital allocation as the driver of wealth creation, and how this changes depending on a company's lifecycle stage. We like the team's probabilistic thinking and the blend of quantitative tools and fundamental analysis. Common behavioral biases are well-controlled. There is a judicious use of artificial intelligence tools to streamline workflow. The team has long used such tools. The incoming hire of a "productivity engineer" from Palantir may unblock further productivity gains. However, any impact of prospective process tweaks will need to be assessed. That and the short track record of implementation at this boutique are considerations that currently prevent our highest conviction, but the ingredients are in place. The approach has delivered strong outcomes over the long run in prior guises, and we expect more of the same here.

Morningstar Take by Steven Le 07 Apr 2025

Our conviction in Magellan Infrastructure is maintained thanks to its well-rounded team and robust process, despite the imminent departure of Gerald Stack, the firm's head of investments, head of infrastructure, and a portfolio manager on this strategy. Although there are no pillar rating changes, the unhedged vehicle moves down to a Morningstar Medalist Rating of Bronze because of peer group relativities, while the hedged vehicle retains its Silver rating. Stack relinquished his investment duties at the end of March 2025 and will subsequently depart the firm in July 2025. While this is a considerable loss for the group, the diverse capabilities of the remaining portfolio managers underpin our continued positive view of the team. Ben McVicar and Ofer Karliner were appointed as the co-heads of infrastructure in February 2025, having been integral long-term decision-makers in key areas such as portfolio changes, investment universe construction, and leading research coverage of multiple sectors. Both are experienced and knowledgeable investors, with solid support from portfolio managers David Costello and Jowell Amores and three analysts. Moreover, Magellan's infrastructure team has remained committed and stable over the long term, even throughout the turmoil and changes seen across the broader business since early 2022-a notable difference compared with the global equity strategy. Nonetheless, any potential impact from the evolving corporate situation is an area we continue to monitor. No changes are anticipated to the strategy's time-tested and rigorous fundamental investment process. Magellan's definition of investable infrastructure is more conservative than most peers, requiring a company to own an asset that is essential for the efficient functioning of society and to have earnings that aren't affected by competition, commodity prices, or sovereign risks. The approach leads to a focus on areas such as utilities, toll roads, and airports. More importantly, it supports stable, risk-adjusted returns relative to the category index, which the strategy has delivered over long-term timeframes. A standout feature of the process is the additional rigor and diligence

the firm's investment committee brings to stock analysis, an area where Magellan has a proven track record. This sets it apart from most peers and its core systematic counterpart, as evidenced by strong stock picks in its shift from US utilities to European infrastructure since 2022. Another key benefit of the risk-conscious approach is that it typically leads to smaller declines than the index in falling equity markets. However, the strategy can lag when commodity-driven stocks are in favor, given that it excludes these stocks, as seen in 2024. While there may be short-term deviations from the index, the process is effectively structured to deliver inflation and downside protection-key traits investors typically seek from infrastructure investments. Overall, this strategy remains in highly capable hands and continues to be an appealing proposition. The primary vehicle from which this strategy's pillar ratings are derived is Magellan Infrastructure, ticker 15700.

Morningstar Take by Ibrahim Guled-Warfield 16

Pendal Focus Australian Share remains a top-rated investment option thanks to its excellent investment team and robust investment process. Crispin Murray, Pendal's head of equities, has been the portfolio manager on the strategy since 2005 (he joined the Pendal Group in 1994), and his impact on the investment team and process continues to be overwhelmingly positive. The investment team is unusually large relative to many peers, but it is stable and collaborative. Murray maintains control and keeps a close eye on analyst development through weekly one-on-one sessions with high-level contributors. The investment team's focus and dedication to the investment process is a testament to Murray's ability to lead and motivate. This has been most noteworthy in the period since the Perpetual takeover of Pendal, which was completed in 2023. Altogether, we have confidence in the continuity of this capable team. The resounding strength of this strategy is in bottom-up company research. Company evaluations focus on factors that shift earnings quality and trajectory. Differentiated insights are captured here through tailored engagements with primary and downstream stakeholders across the supply chain. Pendal accentuates its strength in active stock selection through a style-, sector-, and theme-neutral approach in aggregate. However, at times the portfolio may exhibit moderate tilts to manage risk in volatile environments or exploit perceived opportunities, where macroeconomic drivers are a consideration. Sector exposures and average market cap oscillate depending on expectations around key factors like interest rates and inflation. For example, the portfolio leaned out of the size factor and away from cyclicals during the rising interest-rate cycle commencing November 2022. Ultimately, decision-making in portfolio construction is highly skilled while remaining risk-conscious, owing to Murray's extensive experience investing through market cycles. Stability, consistency, and reliability are the foundations upon which the Pendal Focus Australian Share strategy is built and the reason it continues to receive our highest conviction. The primary vehicle from which this strategy's

Morningstar Take by Shamir Popat 25 Sep 2025

Resolution Capital's Global Property Securities strategy continues to merit High ratings for both People and Process Pillars, thanks to its standout team and a time-tested and robust investment approach. Chief Investment Officer and Founder Andrew Parsons leads the portfolio-management team, comprising Marco Colantonio (2002), Robert Promisel (2011), and Julian Campbell-Wood (2013, portfolio manager since 2018). The multisleeve structure has been in place for over a decade, promoting accountability, challenge, and continuity, while reducing key-person risk. Supporting them are six analysts, averaging over a decade of experience, organized by sectors. The analyst team runs a paper portfolio, fostering a devil's advocate culture and cohesiveness between the members. Analysts rotate across the firm's other property strategies, accelerating development and reinforcing a global mindset. Turnover in the analyst ranks has been moderate, with two departures over two years offset by two timely and strategic hires. The investment process has a clear philosophy, focusing on high-quality, low-leverage REITs with recurring earnings and strong stewardship. This has been a key underpin to the long-term outperformance of the strategy. However, short-term challenges over the 12 months to Aug. 31, 2025, saw the process underperform the Morningstar Category index by 2%. Underweighting residential, retail, and office detracted. The process, given its disciplined application of valuations, struggled in timing the cyclical inflection points, with early moves to UK and European storage, while underestimating the broader sector resilience across data centers and retail. Despite the short-term blip, our conviction in the approach to deliver long-term alpha is retained. The idea generation and deep research continue to demonstrate value—leveraging the deep sector skills of the team, supported by detailed site visits and management interactions. The disciplined quality focus on longer-term lease structures, sharper capital allocation, and higher pricing power is evidenced through high-conviction names like Welltower, Ventas, and Digital Realty. Additionally, notable process efficiencies

and edges are gained from the firm's proprietary Swordfish system. Overall, Resolution Capital's skilled team and repeatable process continue to earn our continued confidence. The strategy has unhedged and hedged share classes and an exchange-traded fund (ASX: RCAP). The primary vehicle from which this strategy's pillar ratings are derived is Resolution Capital Global Property Securities, ticker 16747. As of October 2024, Morningstar has refined its alpha assessment methodology, a key input to the Medalist Rating. As a result, some fund ratings under this strategy have declined, despite no changes to pillar ratings or fees.

Morningstar Take by Morningstar Manager Research 31 Jul 2025

Schroder Australian Equity has notable merits, with its skilled leadership applying its robust and battle-tested investment process in an unwavering fashion. The elevated turnover in the team in recent years has persisted, with Ben Chan being the latest departure in August 2024. Cumulatively, these led to concerns around talent retention, the quality of the analyst team, and succession planning. This has warranted a downgrade in the People Pillar rating to Above Average. However, the revised rating still captures the strengths that are present, especially among the senior bench at the helm. Head of Australian equities Martin Conlon has managed this fund since 2003, while deputy head of equities Andrew Fleming has been with Schroders since 2007. Conlon and Fleming are especially thoughtful in applying their 34 years' experience each in researching companies and understanding the economic backdrop when building the portfolio. The broader investment team has a bench of senior and midcareer members that are well-versed in the process, with newer joiners getting traction. That said, ensuring that talent is retained is now a key watchpoint. Schroders' investment process involves detailed fundamental bottom-up assessments to gain an understanding of quality and value. The primary focus of the research is on appraising a company's pricing power, long-term sustainability, and midcycle earnings. We appreciate the team's assiduous application of the repeatable investment process. In addition, we applaud the team's multiple-perspectives approach when scrutinizing company risks, including environmental, social, and governance issues and thematic influences. The resulting benchmark-aware portfolio of around 40-70 stocks is long-term, balanced, and value-tilted. The investment market environment in the past two years to Nov. 30, 2024, has not been conducive to the strategy's approach seeking sustainable cash-flow-generative businesses. Though, through the cycle, the evidence in generating alpha is notable. Overall, its competitive fee, skilled leadership, and enduring process give us confidence in our conviction of the outperformance over the long term. The primary vehicle

Morningstar Take by Eva Cook 02 Aug 2025

Solaris Core Australian Equity remains a compelling choice for investors seeking diversified, style-neutral exposure to actively managed Australian large-cap equities, despite a lukewarm performance year. The fund continues to stand out for its seasoned team, sound investment philosophy, and investor-aligned structure. Solaris maintains its Above Average People Pillar rating, supported by an exceptionally experienced team. The core group of senior members has worked together for more than 25 years-initially at Suncorp and, since 2009, at Solaris. The team's research approach is particularly effective, with each analyst independently selecting and sizing stocks, as well as operating as the portfolio manager for their respective sector. This structure promotes accountability and generates strong stock insights, thanks to its deep understanding of industry dynamics. This insight-driven research complements Solaris' focus on identifying companies with predictable growth, where grasping sector trends is essential to evaluating competitive advantages. Chief Investment Officer Michael Bell ensures the portfolio is cohesively managed and oversees risk, helping prevent unintended exposures. Solaris' flat team and widespread structure ownership-extending to the analyst level-have played a key role in attracting and retaining top talent. The team's significant personal investment in Solaris funds underscores a strong alignment with investor interests. That alignment is further reinforced through the performance alignment, or PA, share class, which only charges fees when the fund outperforms its benchmark, the ASX 200. The firm also demonstrated its resilience and operational stability in 2023, navigating the departure of Co-Chief Investment Officer Sean Martin with minimal disruption. The transition was handled smoothly, maintaining continuity across the investment team and reinforcing Solaris' depth of leadership. Solaris' investment strategy is anchored in a disciplined bottom-up stock selection process, complemented by a portfolio design that remains benchmark-aware and style-neutral. The fund's process continues to merit its High Pillar rating, reflecting consistent

Fund Manager Solaris Investment Management Limited

execution and a clear link between stock-level alpha signals and position sizing-higher expected risk-adjusted returns translate to greater portfolio weight. A standout feature is Solaris' rigorous risk management, which ensures that portfolio outcomes are primarily driven by stock selection rather than broader factors such as sector or market-cap tilts. This disciplined approach results in a lower risk profile relative to the index, offering investors a distinct source of incremental alpha compared to peers with more concentrated exposures or pronounced style biases. Investors are offered two pricing models: a straightforward base-fee option at 0.90% annually and the PA share class, which foregoes a management fee entirely in favor of a 30% performance fee on returns exceeding the ASX 200 benchmark. With cost parity achieved at a gross alpha of 3% and the manager's internal alpha target set between 2% and 3%, the PA option represents compelling value-particularly given Solaris' historically low tracking error. Although performance has faced headwinds during 2020, 2021, and-more mildly-in 2025, the strategy's long-term track record dating back to 2001 remains a pillar of its credibility. Solaris Core Australian Equities continues to stand out as a top-tier choice for investors seeking a core allocation to an Australian large-cap manager. The primary vehicle from which this strategy's pillar ratings are derived is Solaris Core Australian Equity, ticker 16567.

Managed Fund Investment Detail Disclosure Statement - Advanced

Quick Stats

Morningstar Category

Based on exposure to asset classes, investment sectors, the investment style and market-cap allocation, and the associated risk and return characteristics of funds. The objective of the classification system is to provide groupings of funds which can be reasonably considered to be close investment alternatives and for which performance and other statistics such as fees are comparable.

Morningstar Medalist Rating ™

Is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to the Section titled "Methodology Documents and Disclosures"

https://shareholders.morningstar.com/investor-relations/governance/Compliance--Disclosure/default.aspx

% Data Coverage: the level of data completeness used to generate the overall rating. If the pillar is assigned directly or indirectly by analysts (pillar inheritance), the pillar will have complete data (i.e. 100%). If the pillar is assigned by machine learning algorithm, Morningstar counts the number of data points feeding both the positive and negative models and counts whether the vehicle has strategy-specific data available. A percentage is calculated per pillar. The overall % data coverage is then scaled by pillar weights. Morningstar will not produce a Medalist Rating with less than 80% data availability for algorithmically assigned pillar assessments.

Analyst-Driven Proportion: displays the weighted percentage of a vehicle's pillar ratings assigned directly or indirectly by analysts (pillar inheritance). For example, if the Parent and Process ratings are assigned directly or indirectly by analysts but the Process rating is assigned algorithmically, the Analyst-Driven Proportion for an actively managed vehicle would disclose that 55% of the pillar weight was assigned by analysts. In the case of a passively managed vehicle the Analyst-Driven Proportion would disclose that 90% of the pillar weight was assigned by analysts.

Morningstar Pillars: The three Medalist Rating assessment pillars - People, Parent and Process - may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using Morningstar's machine learning algorithm. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars evaluated with Morningstar's machine learning algorithm

are displayed with "Q" behind the Pillar name.

Morningstar Rating ™

The rating is calculated for funds with at least a three-year history based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance. The top 10% of funds in each peer group receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The peer group is determined by the fund's Morningstar Category and Legal Type. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year Morningstar Rating metrics.

Morningstar Take

The Morningstar Take is a summary of Morningstar's overall opinion of the fund manager's strategy and capabilities in the asset class. If Morningstar has not qualitatively reviewed the manager, the PDS Objective and Fund Investment Strategy will appear in its place.

Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment.

Growth of \$10,000: The graph compares the growth of \$10,000 in a fund with that of a capital market index chosen by Morningstar and with that of the average growth for all funds in its Morningstar peer group. The index is an unmanaged portfolio of specified securities. The index and the category average do not reflect any initial expenses however the category average returns are net of ongoing fees. A fund's portfolio may differ significantly from the securities in the index.

Quartile Rank: The graph represents the fund's total return percentile rank among funds in the same peer group. The black bar on the graph represents the quartile in which the fund-performance ranking falls. If the top quarter of the graph is shaded, for example, the fund performed among the top 25% of its category that year.

Total return reflects performance without adjusting for sales charges but is adjusted to reflect all actual ongoing fund expenses and assumes reinvestment of distributions. Growth return is the percentage change in the scheme's soft close exit price adjusted for any capital re-organisation. Income return is the total return less growth return and reflects the level of distributions from a fund. For Australian funds, performance is not adjusted for taxation. For New Zealand PIE funds, tax credits are added back to the performance. For New Zealand non-PIE funds returns are calculated net of tax. Trailing returns for periods over one year are annualised.

Risk Measures

Standard deviation: Statistical measure of the volatility of the fund's return.

Sharpe ratio: A risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. A positive Alpha figure indicates the portfolio has performed better than its beta would predict.

Beta: A measure of a fund's sensitive to market movements. If beta is greater than one, movements in value of the fund that are associated with movements in the value of the benchmark tend to be amplified.

R-Squared: Measures the relationship between a portfolio and its benchmark. It can be thought of as a percentage

from 1 to 100. R-squared can be used to ascertain the significance of a particular beta or alpha. Generally, a higher R-squared will indicate a more useful beta figure.

Food

Total Cost Ratio (Prospective): Represents the forward-looking figure encompassing the total non-discretionary fees and costs associated with managing and administering collective investment products.

Buy-Spread/Sell-Spread: A transaction cost incurred by the investor that reflects an estimated transaction costs incurred by the fund in dealing with the underlying securities as shown in the PDS.

Performance Fee Costs: Performance Fee shown in the "Fees and Costs Summary" table in the PDS. It is intended as a representation of potential on-going performance fee expenses and is a calculated average using the performance fee costs from the last five financial years (or as many as the performance fee was applicable). This amount includes the Performance Fee costs arising from Interposed Vehicles.

Investment Management Fee: The Management Fee (MIS) and Investment Fees (Super) shown in the PDS, that is attributable to investment management, which are fees and costs an investor would expect to be charged over the year. This excludes the costs arising from interposed vehicles.

Administration Fees and Costs (Super Funds only): shown in the "Fees and Costs Summary" table in the PDS. This includes OTC Derivative Costs deemed to be Administration costs.

Portfolio

Composition: The graph represents a breakdown of the fund's holdings into general investment classes based on surveyed data provided by the fund manager.

Morningstar Style Box: For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitive as measured by a bond's duration (short, intermediate or long).

Top Holdings: The largest exposure of eligible securities within a fund's portfolio. Portfolio holdings information is based on the most recent information available to Morningstar, and eligible securities are defined by Morningstar's Global Methodology team, and will exclude positions not considered core to the portfolio.

Top 5 Sector Weightings: The Morningstar sector structure divides the stock universe into 129 industries ranging from semiconductors to medical equipment. These industries are classified into 41 industry groups, which are then used to construct 12 separate sectors.

Top 5 Countries: The largest geographical exposure of a fund's stock assets. Country assignments are based on the primary exchange where each stock is traded.

Operations

Minimum Initial Investment: The smallest investment amount accepted by the product to establish a new account

Minimum Additional Investment: The amount required to make subsequent investments in the product.

Minimum Withdrawal: The smallest amount that can be taken out of the product at one time.

Switching Allowed: If it's possible to switch between investments in the same offer document.

Distributions Frequency: The number of times per year a fund intends to distribute for the life of the offer document.
