# Morningstar Multi-Sector Series Moderate

Q22025

Preparation Date: 25/06/2025

Research Pack

About this research pack

A research pack for financial advisers using the Morningstar Multi-Sector Series Moderate Managed Account Portfolio. This pack shows analyst ratings and/or recommendations on the underlying portfolio holdings.

#### **About Morningstar**

Morningstar is a leading provider of asset allocation, portfolio construction and investment research services with over 35 years' experience in the United States, Australia and other international markets. Morningstar advises and manages funds for superannuation funds, institutions, platform distributors, financial advisers and individuals.

Morningstar's disciplined investment approach delivers objective, cost effective and holistic solutions for our clients - helping them reach their financial goals. This long-term, valuation driven approach is underpinned by an emphasis on preserving capital and undertaking comprehensive fundamental analysis of global asset classes and securities.

This document is issued by Morningstar Investment Management Australia Limited (ABN 54 071 808 501, AFS Licence No. 228986) ('Morningstar'). Morningstar is the Responsible Entity and issuer of interests in the Morningstar investment funds referred to in this report. © Copyright of this document is owned by Morningstar and any related bodies corporate that are involved in the document's creation. ## **Exchange-Traded Fund (ETF) Investment Detail Disclosure Statement**

#### Morningstar Category ™

Based on exposure to asset classes, investment sectors, the investment style and market-cap allocation, and the associated risk and return characteristics of the investment. The objective of the classification system is to provide groupings of investments which can be reasonably considered to be close investment alternatives and for which performance and other statistics such as fees are comparable

#### Morningstar Medalist Rating ™

The Morningstar Medalist Rating is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a riskadjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to the Section titled "Methodology Documents and Disclosures" at

https://shareholders.morningstar.com/investor-relations/governance/Compliance--Disclosure/default.aspx

**% Data Coverage** The level of data completeness used to generate the overall rating. If the pillar is assigned directly or indirectly by analysts (pillar inheritance), the pillar will have complete data (i.e. 100%). If the pillar is assigned by machine learning algorithm, Morningstar counts the number of data points feeding both the positive and negative models and counts whether the vehicle has strategy-specific data available. A percentage is calculated per pillar. The overall % data coverage is then scaled by pillar weights. Morningstar will not produce a Medalist Rating with less than 80% data availability for algorithmically assigned pillar assessments.

Analyst-Driven Proportion Displays the weighted percentage of a vehicle's pillar ratings assigned directly or indirectly by analysts (pillar inheritance). For example, if the Parent and Process ratings are assigned directly or indirectly by analysts but the Process rating is assigned algorithmically, the Analyst-Driven Proportion for an actively managed vehicle would disclose that 55% of the pillar weight was assigned by analysts. In the case of a passively managed vehicle the Analyst-Driven Proportion would disclose that 90% of the pillar weight was assigned by analysts.

Morningstar Pillars The three Medalist Rating assessment pillars - People, Parent and Process - may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using Morningstar's machine learning

#### Morningstar Rating ™

Calculated for all funds in peer groups of comparable funds and that have at least a three-year performance history. The peer group is determined by the fund's Morningstar Category and Legal Type. The Morningstar Rating is based on the Morningstar Risk-Adjusted Return measure. The top 10% of funds in each peer group receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars and the bottom 10% receive one star. The Overall Morningstar Rating for a fund is a weighted average of its three-, five- and ten-year Morningstar Ratings.

#### **Morningstar Take**

A summary of Morningstar's overall opinion of the manager's strategy and capabilities in the asset class. If Morningstar has not qualitatively reviewed the manager, the PDS Objective and Investment Strategy will appear in its place.

#### **Pricing Information**

**Closing Market Price:** The price of the ETF's ordinary shares as at the close of trading day.

**Net Asset Value (NAV):** The value of the underlying investments in the portfolio on a per share basis. This is computed daily (or monthly) by dividing the total net assets by the total number of shares. The price of an ETF relates to its NAV, but ultimately is determined by supply and demand. Therefore, an ETF may trade at a discount, premium or at par to its NAV. The NAV will fall any time an ETF makes a distribution, regardless of the distribution amount. Because NAVs fluctuate daily/monthly with the market, meaningful performance assessment should be based on the NAV rather than just movements in the share price.

Premium/Discount: The premium or discount of the market price to the Net Asset Value (NAV) expressed as a percentage of the NAV. This is based on an average of month-end prices for the year. We calculate each month-end premium/discount figure, and then average out those 12 months for an average yearly premium/discount.

'Premium/Discount Avg%': Refers to the average monthly premium or discount over the time period specified.

**'Premium/Discount High % and Low %':** Refer to the highest and lowest premiums or discounts over the time period specified.

#### Trading Information

**52-Week High/Low:** The highest and lowest market close prices traded over the last 52 weeks.

**Average Daily Shares Traded (1 Yr):** The average daily traded number of shares over the trailing 52-week period.

**Shares Outstanding:** The number of ordinary shares outstanding in the market as at the specified date.

**Exchange:** The local stock exchange on which the ETF is listed and trading.

#### Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment.

**Growth of \$10,000:** The graph compares the growth of a \$10,000 investment (based on Close Market Price and NAV) with that of a capital market index chosen by the investment manager and with that of the average growth for all investments in the equivalent Morningstar Open-End Managed Funds peer group. The index is an unmanaged portfolio of specified securities. The index and the category

average do not reflect any initial expenses however the category average returns are net of ongoing fees. A portfolio may differ significantly from the securities in the index.

Total return reflects performance without adjusting for sales charges but is adjusted to reflect any capital re-organisation (eg. an issue of bonus shares) and all actual ongoing expenses. It also assumes reinvestment of distributions. If adjusted for sales charges and the effects of taxation, the performance quoted would be reduced. Trailing returns for periods over one year are annualised.

Monthly Trading Volume (Millions): The total number of ordinary shares which has traded during each calendar month

#### Risk Measures (NAV)

**Standard Deviation:** Statistical measure of the volatility of the fund's return.

**Sharpe Ratio:** A risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

**Tracking Error %:** Tracking Error is a measure of the volatility of excess returns relative to a benchmark.

**Information Ratio:** Information Ratio is a risk-adjusted performance measure. The Information Ratio is a special version of the Sharpe Ratio in that the benchmark doesn't have to be the risk-free rate.

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by Beta. A positive Alpha figure indicates the portfolio has performed better than its Beta would predict.

**Beta:** A measure of a fund's sensitive to market movements. If beta is greater than one, movements in value of the fund that are associated with movements in the value of the benchmark tend to be amplified.

#### Fees

**Investment Management Fee % pa:** This is the amount as a percentage of the investor's assets that the investment manager is entitled to charge an investor each year.

**Total Cost Ratio (Prospective):** Represents the forward-looking figure encompassing the total non-discretionary fees and costs associated with managing and administering collective investment products.

#### Portfolio

Morningstar Style Box: The Morningstar Equity Style Box<sup>™</sup> For equity ETFs the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income ETFs the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitive as measured by a bond's duration (short, intermediate or long).

**Top 20 Holdings:** The largest equity exposures of an ETF's portfolio. Portfolio holdings information is based on the most recent information available to Morningstar.

Top 5 World Regions: An ETF's largest regional exposures.

Market Cap Breakdown: The ETF's equity investment exposure broken down by market capitalisation (giant, large, medium, small, or micro).

#### Morningstar Rating

#### Morningstar Take by Shamir Popat 11 Jun 2025

The Barrow Hanley Global Value Equity strategy continues to earn our strongest convictions in both its tenured high-caliber team and its consistent approach to pragmatic value investing. The underlying share classes are available as AUD-hedged or unhedged vehicles. Strategy lead Brad Kinkelaar, along with comanagers David Ganucheau and Cory Martin, leverages over 30 years of industry experience on average in demonstrating their skills and insights. They are well-supported by the stability, depth, and experience of the 27-member investment team organized by geography and sectors. All members of the investment team have equity in the business, fostering investor alignment on top of their competitive remuneration structures. There has been some elevation in turnover over the past two years, with a retirement and the departures of two analysts and portfolio manager TJ Carter. The latter was a rarity, considering it was the only voluntary departure of a portfolio manager in decades, highlighting the firm's strong culture. Robust bottom-up fundamental analysis underpins this strategy, as the team seeks to identify solid businesses that are mispriced by the market. Downside scenarios are clearly a consideration when evaluating the investment theses and avoiding value traps, supporting strong risk management. A distinguishing feature of the strategy is its ability to tilt between defensive and cyclical value positions as market conditions evolve, an outcome of bottom-up stock selection rather than top-down macro calls. As a result, the portfolio may lag during sharp deep-value rallies owing to its balanced exposure across value substyles. This process results in a diversified 50- to 70-stock portfolio with a true investor mindset, active share is high, and turnover is low. The underlying strategy has been running since 2010 and has performed well ahead of the MSCI World Value Index and well ahead of most of its value peers, given its ability to avoid the risks in deep value stocks. This is a commendable long-term performance profile, though it is noted that the value style can deviate from the Morningstar Category benchmark for prolonged periods of time. Barrow Hanley Global

Out of 107 funds as at 31 May 2025

#### Morningstar Take by Stephen Welch 16 Jun 2025

American Funds New Perspective's (which includes the Capital Group-branded Luxembourg, Australian, and Japan vehicles) experienced managers and unrivaled analytical support ply a well-thought-out process focusing on firms benefiting from global trade. Morningstar has changed the way we assess alpha opportunity for funds, which is a key component in our Morningstar Medalist Rating calculation. More of this strategy's Medalist Ratings than usual may therefore change with this update, even in the absence of substantial changes to pillar ratings or fund costs. Industry veterans steer this strategy. Four of the strategy's 10 managers have served together since December 2005, with most tenured Robert Lovelace serving more than two decades. All but one manager has been with the firm for at least 20 years. In March 2025, Barbara Burtin took over for Joanna Jonsson (who remains a manager) as one of the strategy's principal investment officers, in charge of allocating capital among the management team. She is an up-and-comer at the firm and has been on the strategy for more than six years. Behind the management team sits a deep and talented analyst team, which consists of more than 100 members. The managers employ a proven approach focusing on global multinationals that can take advantage of evolving global trade. Capital Group, the parent of American Funds, splits the strategy's USD 145 billion asset base as of May 2025 into individual sleeves among 10 named managers, a handful of undisclosed up-and-comers, and two analyst-run research sleeves. Two principal investment officers help ensure the strategy's sleeves meld together into a diversified global portfolio. The managers run their sleeves of the overall portfolio as they see fit but must stick to companies that receive at least 25% of their revenues from outside their home region and have at least a USD 3 billion market-cap float at the time of purchase. The strategy has been incredibly reliable at protecting capital in down markets, benefiting investors over the long term. Over the trailing five-, 10-, 15-, and 20-year periods through May 2025, the US fund outperformed the MSCI All-Country World Index and ranked

#### Morningstar Take continued from previous page

in the global large-growth Morningstar Category's top 30% or better each period. In the first five months of 2025, the strategy handily outperformed the MSCI ACWI, thanks to picks like MercadoLibre and Netflix. This is a top-notch global equity option, and there's little reason to believe the strategy can't build on its record.

## Colchester Global Government Bond I ETL5525AU

Morningstar Medalist Rating Morningstar Category

**Bronze** Bonds - Global

#### Morningstar Take by Giovanni Cafaro 30 May 2025

A time-tested process and a well-credentialed and collegial team make Colchester Global Bond a sound choice for investors seeking global sovereign bond exposure. Fixed-income veterans and Colchester co-founders Ian Sims and Keith Lloyd have worked together since 2000, leading an experienced investment team that exhibits low turnover. While the leaders have been in place long term, there is a depth of investment talent they can leverage. The culture of the firm promotes probing inquiry and rational decision-making, which is important as their process leads to significant tilts away from the FTSE World Government Bond Index benchmark. Colchester applies a value-oriented philosophy to investing in government bonds and currencies. It follows a clear, simple, and repeatable process centered on assessing value using proven economic frameworks: expected inflation-adjusted real return and purchasing power parity forecasts over the medium term. The team undertakes detailed country financial stability research and incorporates environmental, social, and governance factors into its process. The team's value approach and preference for markets with a higher real yield have historically led to a differentiated portfolio with a skew toward "non-classic" countries. Being prepared to back their research has resulted in significant underweightings in the major US and euro government-bond markets and consequential significant overweightings in countries such as Mexico, New Zealand, and Indonesia. The strategy's typical country and currency allocations can therefore lead to risk/reward outcomes that may differ compared with its benchmark, as well as core peers in the space. However, the discipline of the approach has paid dividends with better risk-adjusted performance than the FTSE World Government Bond Index and Morningstar Category peers since inception. While higher-than-average fees on some of the strategy's share classes are a headwind, for patient investors, Colchester remains a worthwhile option in the global-bond space.

#### Morningstar Take by Morningstar Manager Research 31 May 2025

Fidelity Australian Equities' esteemed portfolio manager and time-tested approach is the driving force behind our continued conviction. Paul Taylor has led this strategy uninterrupted since its inception in 2003 and is the key architect behind its investment philosophy, process, and portfolio construction. We regard him as one of the most talented investors in the industry, owing to his deep and broad investment knowledge. In January 2022, he was made head of investments at Fidelity Australia. Importantly, the additional duties are minimal, and we don't believe it has been a burden on his time. While key-person risk exists here, we are confident that Taylor remains fully engaged and highly motivated. Our admiration for Taylor's patient long-term mindset and diligent approach remains steadfast. The portfolio's annual turnover has indeed been consistently low, averaging around 11% over the past five years to September 2024. The underperformance from 2022 to October 2024 is ultimately Taylor's second blemish in an otherwise stellar extensive track record, a rare achievement. The market environment during this time exhibits notable similarities to the post-2016 "reflation rally" period, which was the strategy's first relative setback. Macroeconomic forces like inflationary pressures, rising interest rates, and the US federal election cycle shaped equity markets globally over these timeframes. Against this backdrop, the quality-growth portfolio will naturally face challenges because of its bias for long-duration, high-quality, cash-generative franchises, which tend to be interest-rate-sensitive and carry premium multiples. A few idiosyncratic missteps have undeniably added to the short-term woes here. However, a combination of the unwavering application of the "through-the-cycle" approach and a proven track record in identifying structural growth winners, instills confidence in the strategy's ability to deliver superior long-term returns. Overall, we are confident that the strategy's distinguished portfolio manager and core principles will steer it through this short-term challenge and return it to a path of sustained success. The primary vehicle from which

Equity World - Currency Hedged

#### Morningstar Take by Gregg Wolper 01 May 2025

GQG Partners Global Quality Equity (named GQG Partners Global Equity outside the US) doesn't stand still. Its unusually flexible approach carries risks but has worked out well for shareholders and should continue to do so. Manager Rajiv Jain has posted impressive returns at several funds during long tenures at previous employer Vontobel and at GQG, which he co-founded in 2016. This global strategy, launched in Australia in June 2017 and in Europe and the US in early 2019, has flourished. From April 1, 2019, through March 31, 2025, the 13.4% annualized return of the US-domiciled fund's institutional shares trounced the averages for the global large-stock growth and global large-stock blend Morningstar Categories (for US-based funds). It also landed well ahead of its prospectus benchmark, the MSCI All Country World Index, and even topped that index's growth version. A key to that record was a remarkable showing in 2022's dismal market. The institutional shares of the US-domiciled fund lost only 3.7% in 2022, while the MSCI ACWI dropped 18.4% and the global large-stock growth average plunged 27.9%. The fund avoided most of the carnage by making a drastic shift away from what Jain and his team considered to be overly expensive technology stocks and toward the energy sector. That shift paid off when tech stocks sank in value and the fund's energy firms found market favor. When tech valuations dropped far enough, the fund partly reversed the shift, allowing it to post competitive gains in the rallies of 2023 and 2024. Jain is currently wary of the effects of rising tariffs-though he concedes there's no telling where they'll end up-and has taken note of recent cautious comments on spending by big tech firms. As a result, the tech weight has again been slashed, to 7.6% in the March 2025 portfolio (according to GQG's classifications) versus the index's 23.4%. Old-school names like AT&T, Philip Morris International, and Duke Energy populate the top 10. Such decisive shifts can backfire; not all of GQG's decisions have yielded such clear success. But they result from deep analysis into companies' earnings growth and financial strength, evaluation of changes in the economic

### **Greencape High Conviction HOW0035AU**

Morningstar Medalist Rating Morningstar Category **₩** Gold

Equity Australia Large Growth

#### Morningstar Take by David Little 11 Sep 2024

Greencape High Conviction stands out with the high quality of the investment team and a highly researched process that has led to strong insights over a long period. David Pace has managed this portfolio skillfully since starting the firm with Matthew Ryland in 2006. Jonathan Koh as co-portfolio manager since March 2019 continues to demonstrate his skills in portfolio construction, benefiting from the high-caliber experience of the firm's co-founders. Pace and Koh maintain a positive working dynamic and are part of a tight-knit team that now comprises seven investors. The group is highly incentivized for future success through building further layers of succession with the recent hire of Chris Tolj as an additional supporting investor. The team's willingness to go the extra mile through a busy company research schedule ensures it is able to develop insights not easily obtainable by the broader market. Their investment thought process is extremely thrifty, too, not willing to leak alpha unnecessarily, such as maintaining exposure to the banks in the tail of the portfolio to manage index relative risk. Greencape's meticulous fundamental research is focused on company business models and management. The team has built a vast network of company contacts, traveling widely to collect knowledge and identify underappreciated market milestones for stocks to rerate. As the name suggests, the high-conviction portfolio is quite concentrated, typically holding around 40 stocks. Greencape has the flexibility to allocate up to 10% of the portfolio to listed offshore companies, which has been a source of recent added value through the team being earlier investors than most in Nvidia. This strategy had AUD 6.7 billion in assets under management and AUD 14.9 billion across the firm as of June 2024, which continues to be a watchpoint. However, the firm has shown discipline in managing capacity and hunger to preserve alpha generation. While bottom-up oriented, Greencape has also shown a willingness to back its broader market views, having recently shifted the leaning of the portfolio from a defensive to a more cyclical posture. The team's market awareness has helped deliver a remarkably

Morningstar Rating \*\*\*\*

Out of 101 funds as at 31 May 2025

#### Morningstar Take by David Little 05 Apr 2025

Janus Henderson Tactical Income utilizes a value-oriented process in a more flexible absolute-return-oriented manner, benefiting from the ideas of its high-quality local team. Lead manager Jay Sivapalan has been with the firm for over two decades and has rebuilt a flat and cohesive team culture since assuming sole lead responsibility in 2019. While Sivapalan remains the key individual, this is tempered by the support of Shan Kwee, who impresses with his leadership support and oversight of credit. Janus Henderson is otherwise a reasonably resourced local group, which has shown an ability in recent times to garner a positive flow of investment ideas leading to positive outcomes, particularly within credit. The strategy offers more flexibility and less interest-rate risk relative to a typical Australian bond offering-something reflected in its benchmark, which is split 50% between the AusBond Bank Bill and AusBond Composite indexes. In addition to the traditional AusBond Composite Index universe (which Australian government entails government-related bonds, credit, and securitized instruments), the portfolio can invest in riskier sectors like emerging markets, loans, and high yield through non-AUD issuers. That said, these have historically been used sparingly. Janus Henderson has shown initiative by leading new bond deals through reverse enquiry in the AREITs sector over the past two years, which have been additive for performance and require strong relationships that are not easy for peers to replicate. While duration management has not been a strong suit for Janus Henderson, the strategy's structurally lower duration has also been beneficial for performance in recent years relative to its Morningstar Category peers. This strategy tends to allocate more heavily to credit for income yield and is overall expected to provide less defensive cushion in periods where equity markets sell off. Janus Henderson's stable and well-led capability makes this a strong choice for investors seeking a more flexible absolute return approach with less interest-rate risk. The primary vehicle from which this strategy's pillar ratings are derived is Janus Henderson Tactical Income.

#### Morningstar Take by Steven Le 07 Apr 2025

Our conviction in Magellan Infrastructure is maintained thanks to its well-rounded team and robust process, despite the imminent departure of Gerald Stack, the firm's head of investments, head of infrastructure, and a portfolio manager on this strategy. Although there are no pillar rating changes, the unhedged vehicle moves down to a Morningstar Medalist Rating of Bronze because of peer group relativities, while the hedged vehicle retains its Silver rating. Stack relinquished his investment duties at the end of March 2025 and will subsequently depart the firm in July 2025. While this is a considerable loss for the group, the diverse capabilities of the remaining portfolio managers underpin our continued positive view of the team. Ben McVicar and Ofer Karliner were appointed as the co-heads of infrastructure in February 2025, having been integral long-term decision-makers in key areas such as portfolio changes, investment universe construction, and leading research coverage of multiple sectors. Both are experienced and knowledgeable investors, with solid support from portfolio managers David Costello and Jowell Amores and three analysts. Moreover, Magellan's infrastructure team has remained committed and stable over the long term, even throughout the turmoil and changes seen across the broader business since early 2022-a notable difference compared with the global equity strategy. Nonetheless, any potential impact from the evolving corporate situation is an area we continue to monitor. No changes are anticipated to the strategy's time-tested and rigorous fundamental investment process. Magellan's definition of investable infrastructure is more conservative than most peers, requiring a company to own an asset that is essential for the efficient functioning of society and to have earnings that aren't affected by competition, commodity prices, or sovereign risks. The approach leads to a focus on areas such as utilities, toll roads, and airports. More importantly, it supports stable, risk-adjusted returns relative to the category index, which the strategy has delivered over long-term timeframes. A standout feature of the process is the additional rigor and diligence

Fund Status

#### Morningstar Take continued from previous page

the firm's investment committee brings to stock analysis, an area where Magellan has a proven track record. This sets it apart from most peers and its core systematic counterpart, as evidenced by strong stock picks in its shift from US utilities to European infrastructure since 2022. Another key benefit of the risk-conscious approach is that it typically leads to smaller declines than the index in falling equity markets. However, the strategy can lag when commodity-driven stocks are in favor, given that it excludes these stocks, as seen in 2024. While there may be short-term deviations from the index, the process is effectively structured to deliver inflation and downside protection-key traits investors typically seek from infrastructure investments. Overall, this strategy remains in highly capable hands and continues to be an appealing proposition. The primary vehicle from which this strategy's pillar ratings are derived is Magellan Infrastructure, ticker 15700.

### MFS Hedged Global Equity Trust W ETL0041AU

Morningstar Medalist Rating **Bronze** 

**Morningstar Category** Equity World - Currency Hedged

#### Morningstar Take by Eva Cook 15 Mar 2025

MFS Global Equity retains the qualities we admire: a pair of insightful portfolio managers who actively look to harness the firm's extensive research staff while patiently implementing their well-trodden process benefiting from their long-term horizon. Comanagers Roger Morley and Ryan McAllister uphold a long-standing tradition of investing in reasonably priced companies with long-term, above-average, durable growth. Morley has long tenure at the firm, while McAllister's transition to comanager in 2016 has been as smooth as could be hoped for. He has steadily broadened his knowledge across industries and has worked cohesively with Morley. Further, we think the duo utilizes MFS' broader analyst team very effectively. Their long-term perspective remains paramount in gauging their colleagues' insights on company and industry-level views, and the portfolio managers' clear recall of how their historic views have evolved reinforces the consistency of the approach taken. The methodical approach is disciplined and ignores index weightings, as seen in its long-standing skew to industrials and healthcare companies at the expense of commodities and technology. Tension in balancing quality and value is inevitable, but sensible portfolio construction has been executed well. That said, it hasn't all been plain sailing. Emphasizing valuation has cost the managers some opportunities, as they waited for the "ideal" time to invest. This has been most evident in the IT sector. Disappointment over subpar performance is understandable, though it is in line with expectations in a concentrated high-growth environment. Moreover, the market's abandonment of high-flying growth stocks in 2022 and 2023 was a reminder that styles can shift from favor swiftly. The team has also continued to identify longer-term winners elsewhere. MFS has a demonstrated history of putting client interests ahead of its own when it comes to managing capacity in both its Core and Concentrated global equity strategies. MFS Global Equity retains significant competitive strengths, underpinning our positive conviction in the strategy. The primary vehicle from which this strategy's pillar ratings are derived is

### PIMCO WS Plus Global Bond BTA0498AU

Morningstar Medalist Rating Morningstar Category **₩** Gold

Bonds - Global

#### Morningstar Take by Morningstar Manager Research 31 May 2025

Pimco Global Bond is backed by three skilled managers who draw on the firm's extensive resources, and it benefits from a flexible, diversified approach, earning High People and Process ratings. Lead manager Andrew Balls has two decades of experience running global and European mandates, and the three-person investment team, including veteran comanagers Sachin Gupta and Lorenzo Pagani, is well-equipped to cover rates, currencies, corporates, and structured credit. Pimco's top-down views, driven by the firm's investment committee on which Balls sits, guide the strategy's broad positioning. Within the scope of those themes, Balls and his team consider relative valuations to determine sector, country, and yield-curve positioning. The setup resembles that of many of its global bond Morningstar Category peers, but the approach of this strategy also allows for considerable flexibility. The fund has historically held up to half its assets in corporate bonds, and up to a third in emerging-markets debt, it can also invest up to 10% in below-investment-grade bonds. The team has used this latitude well and in moderation along with its work in developed-markets sovereign bonds, which typically anchor the portfolio. Andrew Balls has also tended to stay on the shorter side of the benchmark's duration, which detracted from returns in the fund's earlier history but helped during recent interest-rate shocks (such as in the first quarter of 2021 and again in 2022). While the portfolio was light on several credit-spread sectors in late 2024 (as the team didn't see compelling opportunities in the market's riskier pockets), over long periods Pimco has demonstrated considerable skill in corporate credit, securitized bonds, and currencies. Over the trailing three, five, and 10 years through September 2024, the fund's institutional USD shares largely outpaced the category average and the benchmark index while keeping volatility in check. All told, this team is well-equipped to take advantage of the strategy's flexibility over the long haul. This vehicle has been assigned a Morningstar Medalist Rating of Gold as of date May 31, 2025. An analyst assessed the People, Process, and Parent

### **Resolution Capital Global Property Secs WHT0015AU**

Morningstar Medalist Rating **₩** Gold

**Morningstar Category** 

### Equity Global Real Estate

#### Morningstar Take by Ross MacMillan 26 Jul 2024 Resolution Capital Global Property Securities features four outstanding portfolio managers and a straightforward but comprehensive investment process. This high-conviction strategy remains one of our very favorite ways to access global listed real estate investments. Andrew Parsons is the founder of Resolution Capital and holds the roles of chief investment officer and portfolio manager. Parsons' presence underpins our positive view of the team, but this clearly is not a one-person show. For many years, the firm has used а four-person portfolio-multimanager strategy. The other three managers (Marco Colantonio, Robert Promisel, and Julian Campbell-Wood) joined Resolution in 2002, 2011, and 2013, and are all highly seasoned property investors, putting the Resolution team's experience and stability well above rivals despite periodic turnover among the investment analysts. Each portfolio manager takes responsibility for investing approximately 25% of total funds under management, helping reduce key-person risk. All the portfolio managers use the same proprietary research and adopt the same investment procedures. The time-tested investment process is based on four significant principles: Focus on the underlying real estate asset rather than an index, understand real estate is cyclical and capital-intensive, value strong stewardship, and avoid permanent impairment of capital when investing. Critically, the team uses detailed fundamental analysis combined with a top-down overlay, reflecting the dynamics of various real estate markets, to search for investable property companies and trusts that operate high-barrier-to-entry markets where landlords have pricing power and have a high level of recurring earnings, combined with low debt levels. The resulting to 60-stock portfolio is concentrated, benchmark-unaware, and mainly diversified across developed markets. The strategy over the decade to June 30, 2024, has outperformed the index. However, being a high-conviction strategy, returns can be volatile against the index in the short term. The strategy comes in several share classes and an exchange-traded fund (ASX:RCAP), with the wholesale

Morningstar Rating

Out of 279 funds as at 31 May 2025

#### Morningstar Take by Shamir Popat 20 Dec 2024

Schroder Australian Equity has notable merits, with its skilled leadership applying its robust and battle-tested investment process in an unwavering fashion. The elevated turnover in the team in recent years has persisted, with Ben Chan being the latest departure in August 2024. Cumulatively, these led to concerns around talent retention, the quality of the analyst team, and succession planning. This has warranted a downgrade in the People Pillar rating to Above Average. However, the revised rating still captures the strengths that are present, especially among the senior bench at the helm. Head of Australian equities Martin Conlon has managed this fund since 2003, while deputy head of equities Andrew Fleming has been with Schroders since 2007. Conlon and Fleming are especially thoughtful in applying their 34 years' experience each in researching companies and understanding the economic backdrop when building the portfolio. The broader investment team has a bench of senior and midcareer members that are well-versed in the process, with newer joiners getting traction. That said, ensuring that talent is retained is now a key watchpoint. Schroders' investment process involves detailed fundamental bottom-up company assessments to gain an understanding of quality and value. The primary focus of the research is on appraising a company's pricing power, long-term sustainability, and midcycle earnings. We appreciate the team's assiduous application of the repeatable investment process. In addition, we applaud the team's multiple-perspectives approach when scrutinizing company risks, including environmental, social, and governance issues and thematic influences. The resulting benchmark-aware portfolio of around 40-70 stocks is long-term, balanced, and value-tilted. The investment market environment in the past two years to Nov. 30, 2024, has not been conducive to the strategy's approach seeking sustainable cash-flow-generative businesses. Though, through the cycle, the evidence in generating alpha is notable. Overall, its competitive fee, skilled leadership, and enduring process give us confidence in our conviction of the outperformance over the long term. The primary vehicle

#### Morningstar Take by Thomas Dutka 12 Sep 2024

Despite sudden unplanned changes in the manager's global investment leadership, Western Asset Australian Bond's simple approach and excellent team make it a solid domestic fixed-income option. In late August 2024, Western Asset's co-CIO Ken Leech stepped down from the firm amid investigations from the US SEC and Department of Justice concerning US Treasury derivative allocations across accounts managed out of the US. The departure follows the abrupt exit of Federal Reserve policy lead John Bellows in May 2024. Overcoming both key-person losses would be a lot for any firm to handle. That said, this strategy is unlikely to be affected by these departures, given its Australian focus and its management by a veteran Melbourne-based team. Anthony Kirkham is the lead portfolio manager and we hold him in high regard. He is supported by a stable, impressive investment team of six portfolio managers, credit research analysts, and traders. Other than recent appointee Stella Li, an internal hire who fills the role vacated in early 2024 by trader Anthony Francis, the remaining five team members each boast over 25 years' industry experience and extensive tenures working together at Western. There's an appeal to the strategy's straightforward and relatively conservative investment process. It targets an active return of 75 basis points per year (gross of fees) above the Bloomberg AusBond Composite 0+ Index over the market cycle, with an expected tracking error of 100 basis points per year. It seeks mispriced domestic fixed-interest securities, with sector allocation and issuer selection being the major active return drivers. The strategy's persistent credit overweight can be a negative in risk-off conditions, although the team has successfully navigated a number of credit cycles, emphasizing its rigorous credit analysis. While it has modestly underperformed its return objective over the medium to longer term, it has done so by utilizing active risk well below its target, delivering robust risk-adjusted returns. Its return performance has also been consistently strong compared with its Morningstar Category average. Overall, despite Western's offshore turmoil, our conviction

in this strategy remains unchanged. It is run by a topnotch team and the simplicity of its approach continues to make it a compelling domestic fixed-income offering. The primary vehicle from which this strategy's pillar ratings are derived is Western Asset Australian Bond, ticker 5471.

### **Managed Fund Investment Detail Disclosure Statement - Advanced**

#### **Quick Stats**

#### Morningstar Category "

Based on exposure to asset classes, investment sectors, the investment style and market-cap allocation, and the associated risk and return characteristics of funds. The objective of the classification system is to provide groupings of funds which can be reasonably considered to be close investment alternatives and for which performance and other statistics such as fees are comparable.

#### Morningstar Medalist Rating ™

Is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to the Section titled "Methodology Documents and Disclosures"

https://shareholders.morningstar.com/investor-relations/governance/Compliance--Disclosure/default.aspx

**% Data Coverage:** the level of data completeness used to generate the overall rating. If the pillar is assigned directly or indirectly by analysts (pillar inheritance), the pillar will have complete data (i.e. 100%). If the pillar is assigned by machine learning algorithm, Morningstar counts the number of data points feeding both the positive and negative models and counts whether the vehicle has strategy-specific data available. A percentage is calculated per pillar. The overall % data coverage is then scaled by pillar weights. Morningstar will not produce a Medalist Rating with less than 80% data availability for algorithmically assigned pillar assessments.

Analyst-Driven Proportion: displays the weighted percentage of a vehicle's pillar ratings assigned directly or indirectly by analysts (pillar inheritance). For example, if the Parent and Process ratings are assigned directly or indirectly by analysts but the Process rating is assigned algorithmically, the Analyst-Driven Proportion for an actively managed vehicle would disclose that 55% of the pillar weight was assigned by analysts. In the case of a passively managed vehicle the Analyst-Driven Proportion would disclose that 90% of the pillar weight was assigned by analysts.

Morningstar Pillars: The three Medalist Rating assessment pillars - People, Parent and Process - may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using Morningstar's machine learning algorithm. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars evaluated with Morningstar's machine learning algorithm

are displayed with "Q" behind the Pillar name.

#### Morningstar Rating ™

The rating is calculated for funds with at least a three-year history based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance. The top 10% of funds in each peer group receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The peer group is determined by the fund's Morningstar Category and Legal Type. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year Morningstar Rating metrics.

#### Morningstar Take

The Morningstar Take is a summary of Morningstar's overall opinion of the fund manager's strategy and capabilities in the asset class. If Morningstar has not qualitatively reviewed the manager, the PDS Objective and Fund Investment Strategy will appear in its place.

#### Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment.

Growth of \$10,000: The graph compares the growth of \$10,000 in a fund with that of a capital market index chosen by Morningstar and with that of the average growth for all funds in its Morningstar peer group. The index is an unmanaged portfolio of specified securities. The index and the category average do not reflect any initial expenses however the category average returns are net of ongoing fees. A fund's portfolio may differ significantly from the securities in the index.

Quartile Rank: The graph represents the fund's total return percentile rank among funds in the same peer group. The black bar on the graph represents the quartile in which the fund-performance ranking falls. If the top quarter of the graph is shaded, for example, the fund performed among the top 25% of its category that year.

Total return reflects performance without adjusting for sales charges but is adjusted to reflect all actual ongoing fund expenses and assumes reinvestment of distributions. Growth return is the percentage change in the scheme's soft close exit price adjusted for any capital re-organisation. Income return is the total return less growth return and reflects the level of distributions from a fund. For Australian funds, performance is not adjusted for taxation. For New Zealand PIE funds, tax credits are added back to the performance. For New Zealand non-PIE funds returns are calculated net of tax. Trailing returns for periods over one year are annualised.

#### Risk Measures

Standard deviation: Statistical measure of the volatility of the fund's return.

Sharpe ratio: A risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. A positive Alpha figure indicates the portfolio has performed better than its beta would predict.

Beta: A measure of a fund's sensitive to market movements. If beta is greater than one, movements in value of the fund that are associated with movements in the value of the benchmark tend to be amplified.

*R-Squared*: : Measures the relationship between a portfolio and its benchmark. It can be thought of as a percentage

from 1 to 100. R-squared can be used to ascertain the significance of a particular beta or alpha. Generally, a higher R-squared will indicate a more useful beta figure.

#### Fees

Total Cost Ratio (Prospective): Represents the forward-looking figure encompassing the total non-discretionary fees and costs associated with managing and administering collective investment products.

Buy-Spread/Sell-Spread: A transaction cost incurred by the investor that reflects an estimated transaction costs incurred by the fund in dealing with the underlying securities as shown in the PDS.

Performance Fee Costs: Performance Fee shown in the "Fees and Costs Summary" table in the PDS. It is intended as a representation of potential on-going performance fee expenses and is a calculated average using the performance fee costs from the last five financial years (or as many as the performance fee was applicable). This amount includes the Performance Fee costs arising from Interposed Vehicles.

Investment Management Fee: The Management Fee (MIS) and Investment Fees (Super) shown in the PDS, that is attributable to investment management, which are fees and costs an investor would expect to be charged over the year. This excludes the costs arising from interposed vehicles.

Administration Fees and Costs (Super Funds only): shown in the "Fees and Costs Summary" table in the PDS. This includes OTC Derivative Costs deemed to be Administration costs.

#### Portfolio

Composition: The graph represents a breakdown of the fund's holdings into general investment classes based on surveyed data provided by the fund manager.

Morningstar Style Box: For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend or growth). For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitive as measured by a bond's duration (short, intermediate or long).

Top Holdings: The largest exposure of eligible securities within a fund's portfolio. Portfolio holdings information is based on the most recent information available to Morningstar, and eligible securities are defined by Morningstar's Global Methodology team, and will exclude positions not considered core to the portfolio.

Top 5 Sector Weightings: The Morningstar sector structure divides the stock universe into 129 industries ranging from semiconductors to medical equipment. These industries are classified into 41 industry groups, which are then used to construct 12 separate sectors.

Top 5 Countries: The largest geographical exposure of a fund's stock assets. Country assignments are based on the primary exchange where each stock is traded.

#### **Operations**

Minimum Initial Investment: The smallest investment amount accepted by the product to establish a new account

Minimum Additional Investment: The amount required to make subsequent investments in the product.

Minimum Withdrawal: The smallest amount that can be taken out of the product at one time.

Switching Allowed: If it's possible to switch between investments in the same offer document.

Distributions Frequency: The number of times per year a fund intends to distribute for the life of the offer document.
