To outperform a weighted composite of sector market index returns over rolling three year period.

Trailing Returns

	1mth (%)	3mth (%)	6mth (%)	1yr (%)	3yr (%)	5yr (%)	Incp (%)
Portfolio	0.54	0.33	2.77	5.66	5.55	3.52	3.62
Category Average	0.52	0.26	2.69	5.65	6.07	3.87	3.79
Composite Benchmark^^	0.57	0.13	2.53	5.98	6.48	4.06	3.85

Past performance is not a reliable indicator of future performance. Returns over 12 months are annualised.

Dollar Growth Since Inception

Equity Regional Exposure - Portfolio

^ Investment performance represents modelled performance only and assumes income received is reinvested. Investment returns are calculated before tax and after management fees which are inclusive of GST. An individual's performance will differ from the modelled performance depending on factors such as transaction timing, actual management fees, whether income is paid and any divergence from model portfolio weightings or holdings. The fees and costs are net of any rebate (if applicable) paid by an issuer of an underlying managed fund that forms part of the relevant managed portfolio option and is passed on to you. Refer to 'Rebates' in the 'Additional explanation of fees and costs' section of the PDS for further information. ^^Effective 1 November 2025, the constituent benchmarks used in the construction of the Portfolio's composite benchmark are provided by Morningstar, Inc. Historical benchmark returns up to 1 November 2025 will remain unchanged. Morningstar, Inc. operates Morningstar Indexes, which is a separate business unit to Morningstar Investment Management. Morningstar Investment Management is not involved in the construction, methodology, or maintenance of Morningstar Indexes.

Investment Strategy

The portfolio has exposure to a diverse mix of managed fund investments, which include primarily defensive assets and some growth assets. Over the long term, the portfolio aims to have a 70% allocation to defensive assets and a 30% allocation to growth assets.

The portfolio aims to reduce the probability of a negative return through a high exposure to more defensive assets.

The portfolio is constructed around an asset allocation which is based on the long-term objectives of the strategy. The portfolio and asset allocation are reviewed to adapt to changes in market conditions. The asset allocation, selection and blending of managed funds are actively managed with a strong focus on risk.

Fund managers, their funds and the construction of the portfolio are continually reviewed.

The portfolio construction process leverages the investment manager's Manager Research capability to determine funds to be included in the portfolio construction process. The investment manager selects the respective funds and blends them in line with the portfolio's Strategic Asset Allocation guidelines.
